VALUABLE WORKS.

Hohmann's Practical School FOR THE VIOLIN.

AN ELEGANT ENGRAVED PLATE EDITION.

English Translation by Rev. F. F. HAGEN.

Containing numerous exercises, all of which are furnished with signs and figures, showing the correct bowing and fingering. It cannot fail to make accomplished violinists. We take great pleasure in calling attention to our new and elegant edition of this standard work. As it is the best copy that has ever been offered, it cannot fail to supplant the inferior editions which have heretofore been in use. We ask a critical examination and comparison, confident that the result will be all we anticipate.

The work is well known to all teachers of the Violin and has long held a prominent place among the standard works of instruction for this instrument. It is the outcome and elaboration of a work first published in 1836 under the title of, "One Hundred Exercises for Two Violins." It appeared in a new form in 1841. This edition adhered to the original order, but while inferior pieces were omitted, better ones were substituted and the exercises arranged in progressive order. In 1849 it was submitted to a third revision, when exercises for one violin were introduced, with a view of affording material of the most excellent character for daily practice in intonation and fingering. An elaborate series of directions were also introduced in order to show the young player how to handle his instrument to the best advantage. In this form the work passed through twenty-two large editions and gained a reputation which is unequaled by any similar work in print.

Our edition of this splendid work is published in a most careful and artistic manner and in five parts, as well as complete. The parts are bound in Paper—*sewed*—and the complete in Half Cloth. Another important feature, and one which will please the buyers and users of this work, is the prices which we are able to make and which are mentioned below. Compare with the prices asked for other editions.

Part 1.	Bound in Paper—Sewed	50 cents.
Part 2.	Bound in Paper—Sewed	50 cents.
Part 3.	Bound in Paper—Sewed	50 cents.
Part 4.	Bound in Paper—Sewed	50 cents.
Part 5.	Bound in Paper—Sewed	50 cents.
Complete,	Bound in Half Cloth	$2.00.

PRICES NAMED INCLUDE POSTAGE.

If purchasing from a local dealer ask for our edition. Comparison will decide in its favor.

Classic Clarinet Solos, WITH PIANO ACCOMPANIMENT.

A splendid selection of popular pieces, all of which have been selected with great care and arranged by writers who are acknowledged experts both as performers and arrangers.

Clarinet in A.

1 Medley Overture—Babes in the Wood.....J. F. Zimmermann
3 Overture—Chimes of Normandy. .....J. S. Cox
4 Overture—Fatinitza.....J. S. Cox
6 Irish Overture.....Williams
7 Mazurka Caprice.....Hartmann
8 Overture—Hippodrome T. B. Boyer
9 Souvenir de Valence.....Bleger
13 Overture—Lustspiel.....Keler Bela
14 Waltzes—Lizzie.....J. Levy
23 Air from La Favorita. .....H. Prendiville
26 Fantasia—Violet from Mother's Grave.....J. S. Cox
32 Etude de Concert.....Meyer
33 Fantasia—Safe in the Arms of Jesus.....J. S. Cox
36 Concert Waltz—Sweetest Flower. .....J. S. Cox

Clarinet in Bb.

2 Original Caprice—Solitude. .....Mercadante
5 Selection—Pinafore....A. S. Sullivan
10 Waltzes—Approach of Spring.
11 Overture—Le Diadem.....Hermann

Clarinet in Bb (Continued).

12 Waltzes—Fantastic.....F. Zikoff
15 Waltzes—Sounds from the North. .....F. Zikoff
16 Aria—from Falstaff.... H. Prendiville
17 Polka—Fairy Queen.. H. Prendiville
18 Air Varie (Mayseder).H. Prendiville
19 Concert Aire (A Neibig). .....H. Prendiville
20 Scene and Arie (Von Bergson). .....H. Prendiville
21 Cavatina and Coro—from Ernani. .....H. Prendiville
22 Air Varie (F. Behr)....H. Prendiville
24 Weber's Last Waltz, with Variations.....H. Prendiville
25 De Beriot's Seventh Air. .....H. Prendiville
27 Theme and Variations (Bellini). .....H. Prenniville
28 French Air, with Variations.
29 Andante and Variations (Rode). .....H. Prendiville
30 Air and Variations—Favorite. .....Hartmann
31 Polka—Amitie.....Cary
34 Grand Fantasie de Concert... Clappe
35 Andante and Polacca.....Clappe

Price, 50 Cents; Any Five Numbers, $2.00.

Keystone Orchestra Journal, BY A. S. BOWMAN.

To complete the series, we publish the "Keystone Orchestra Journal." This is a very fine collection, and is intended to further the progress of any young Orchestra which, in following our advice, has commenced with the "Teacher's"—and used, in regular order, the "Beginner's No. 1," "Beginner's No. 2" and the "Concert Orchestra" Journals.

INSTRUMENTATION.—1st and 2d Violins, Bass, Flute, Clarinet, 1st and 2d Cornets, Trombone, Piano Accompaniment, *ad lib.* Also extra parts for Tuba (in flat keys) to take the place of String Bass. The Trombone part is published in both Bass and Treble Clefs, and can be played on Trombone, Tenor or Baritone. When ordering, please state which Clef you desire.

1 Beggar Student March (Millocker).
2 Selection—Mikado (Sullivan).
3 Stephanie Gavotte (Czibulka).
4 Overture—Shades of Evening.
5 Dream of Love (Tosti).
6 Overture—Golden Days.
7 'Tis I, Alone, Can Tell (Riegg).
8 Quadrille—Mignonette.
9 Polka Quadrille—Passing Days.
10 Quadrille—Crystal Gem.
11 Coquette.
12 Lancers—Arbutus.
13 Quadrille—Hillside.
14 Courtesy.
15 Lancers—Night Queen.
16 Mazurka Quadrille—Agnes.
17 Fancy Figure—Basket.
18 Dream Faces Waltz (Meissler).
19 Nanon Waltz (Genee).
20 Skater's Waltz (Waldteufel).
21 Sweet Smiles Waltz (Waldteufel).
22 My Dream Waltz (Waldteufel).
23 Mikado Waltz (Sullivan).
24 Dream Waltz (Millocker).
25 Lorena Polka.
26 Gasperone Waltz (Genee).
27 Village Maiden Polka.
28 Herdsman March.
29 Cauliflower.
30 Fireside Schottische.
31 Terrace Mazurka.
32 Greenwood Polka.
33 Sevilla Schottische.
34 Janette Galop.
35 May Blossom Redowa.
36 Mountain Side Galop.
37 New Year.

Each Part, Except Piano, 50c.; Piano Accompaniment, 75c.

The Teacher's Orchestra Journal.

By A. S. BOWMAN.

A series of books designed to accompany "How to Teach Orchestras."

We Publish Nine Parts with the following Instrumentation:

1st Violin, 2d Violin, Bass, Flute, Clarinet, 1st and 2d Cornets, Trombone and Piano Accompaniment. The Trombone part is published in both Bass and Treble Clefs. State, when you order, which Clef you desire.

Each book or part contains Rudiments of Music, Dictionary of Musical Terms, and the part of twelve easy, instructive and popular pieces designed and written for beginners.

CONTENTS:

1 Star Polka.
2 Elm Schottische.
3 Eclipse March.
4 Trooper Galop.
5 Castle Waltz.
6 Watchword Polka.
7 Tower March.
8 Governess Mazurka.
9 Yachtman's Serenade.
10 Norah Waltz.
11 Wayfarer's March.
12 Reveler's Galop.

PRICE: { Single Book, 25 Cents. 16 Books at one time, $3.00. Any order for more than 16 Books, 20 Cents each additional Book.

Beginner's Orchestra Journal, No. 1.

Twenty-Five Easy and Popular Pieces.

By A. S. BOWMAN.

We had barely announced the publication of "The Teacher's Orchestra Journal" before we were overwhelmed with orders. Its wonderful reception led to the immediate preparation of the "Beginner's Orchestra Journal, No. 1." Designed to follow the first named, hence just a shade more advanced.

INSTRUMENTATION.—1st and 2d Violins, 1st and 2d Cornets, Clarinet, Flute, Trombone and Bass, with Piano Accompaniment, *ad lib.* Also extra parts for Tuba (in flat keys) to take the place of String Bass. The Trombone is published in both Bass and Treble Clefs, and can be played on Trombone, Tenor or Baritone. When ordering, please state which Clef you desire.

CONTENTS:

1 Bonaparte's Grand March.
2 Original, or London, Lancers Quadrille (5 figures).
3 Medley Quadrille—Mixtures (containing Popular Songs).
4 Plain Quadrille—Sweetest Bud.
5 Polka Quadrille—Sunset (5 figures).
6 Over Sticks and Stones Galop (Faust).
7 Nosegay Polka.
8 Mabel Waltz (Godfrey).
9 When the Robins Nest Again Waltz (Howard).
10 Sweet Geraniums Schottische (Belasco).
11 Les Roses Waltz (Metra).
12 Rochester Schottische.
13 The Tartar's Galop.
14 Peek-a-Boo (Scanlan).
15 Crystal Schottische (Byerly).
16 Cracovienne—Fancy Dance.
17 May Breeze Polka.
18 My Queen Waltz (Bucalossi).
19 Brookside March.
20 Sadie Mazurka.
21 Skylark Mazurka.
22 The Basket—Fancy Quadrille Figure.
23 The Courtesy—Fancy Quadrille Figure.
24 The Cauliflower—Fancy Quadrille Figure.
25 The New Year—Fancy Quadrille Figure.

Each Part, Except Piano, 25c; Piano Accompaniment, 50c.

Beginner's CONCERT ORCHESTRA Journal BY A. S. BOWMAN

A young orchestra that has gone carefully through the "Teacher's" and "Beginner's" Orchestra Journals, is ready for a more advanced collection—in fact, is desirous of taking hold of something for public performances. We follow No. 2 of the "Beginner's" with the "Concert Orchestra Journal." This collection is made up of standard songs, operatic selections, overtures, etc., and is a most desirable and attractive one for concert purposes.

INSTRUMENTATION.—1st Violin, 2d Violin, Bass, Flute, Clarinet, 1st Cornet, 2d Cornet, Trombone, Piano Accompaniment, *ad lib.* Extra parts for Tuba (in flat keys) to take the place of String Bass when desired. The Trombone part is published in both Bass and Treble Clefs, and can be played on Trombone, Tenor or Baritone. State, when you order, which Clef you desire.

1 Overture—The Grenadiers.
2 Selection—Beggar Student.
3 Selection—Olivette.
4 In the Gloaming.
5 Marseillaise Hymn.
6 Come, Ye Disconsolate.
7 Comin' Thro' the Rye.
8 Harp That Once Thro' Tara's Halls.
9 Baby Darling.
10 Home, Sweet Home.
11 Last Rose of Summer.
12 What Are the Wild Waves Saying?
13 Les Remeaux (The Palms).
14 Then You'll Remember Me.
15 Parting.
16 Old Folks at Home.
17 I Would Not Live Alway.
18 Hail Columbia.
19 I Dreamt That I Dwelt in Marble Halls.
20 'Tis But a Little Faded Flower.
21 Star Spangled Banner.
22 Robin Adair.
23 Come Back to Erin.
24 Viva L'America.
25 Non E'Ver.
26 Auld Lang Syne.
27 Shepherd Boy.
28 Sweet Spirit, Hear My Prayer.
29 Lover and the Bird.
30 America (or God Save the Queen).
31 Russian National Hymn.
32 When the Swallows Homeward Fly.
33 Annie Laurie.
34 Scenes That Are Brightest.
35 Missionary Hymn.
36 Sweet Bye-and-Bye.
37 Safe in the Arms of Jesus.
38 Nearer, My God, to Thee.

Each Part, Except Piano, 25c.; Piano Accompaniment, 50c.

Classic Flute Solos, WITH PIANO ACCOMPANIMENT.

All have elegant concert variations, designed for general use. They are engraved in the best manner, and printed on regular size, best quality, sheet music paper. The best soloists acknowledge this to be the most superior list of Flute Solos published.

1 Carnival of Venice.....J. S. Cox
2 Home, Sweet Home.....J. S. Cox
3 Robin Adair.....J. S. Cox
4 Old Folks at Home (Suwanee River).....J. S. Cox
5 Last Rose of Summer.....Nicholson
6 Safe in the Arms of Jesus...J. S. Cox
7 I Cannot Sing the Old Songs.....Cox
8 Auld Lang Syne.....J. S. Cox
9 Blue Bells of Scotland.....J. S. Cox
10 Annie Laurie.....J. S. Cox
11 Coming Thro' the Rye.....J. S. Cox
12 Columbus (Grand Rhapsodie Americane).....Tereschak

Price, $1.00 Each; Any Six Numbers, $5.00.

DICTIONARY
OF MUSICAL TERMS

Term.	*Signification.*	*Abbreviation.*
Accelerando	With gradually increasing velocity of movement	*Accel.*
Adagio	A very slow movement	*Ad.*
Ad libitum	At will, or discretion	*Ad lib.*
Allegretto	Not so quick as Allegro	*Allᵗᵗᵒ*
Allegro	Quick	*Allº*
Andante	A slow movement	*Andᵗᵉ*
Andantino	Not so slow as Andante	*Andⁿᵒ*
Animato	Animated, life.	
A poco a poco	By little and little.	
Assai	Very.	
A tempo	Original time	*A tem.*
Ben	Well.	
Bis	Over again.	
Brio	Brilliant.	
Cantabile	Graceful.	
Capo	Head or beginning	*C.*
Coda	Termination.	
Con	With.	
Crescendo	To increase	*Cres.*
Da	By, for, from	*D.*
Da Capo	From the beginning	*D. C.*
Di	Of.	
Diminuendo	To decrease	*Dim.*
Dolce	Sweet, delicate	*Dol.*
Energico	Energy.	
Espressivo	Expression	*Espress.*
Finale	End of movement etc.	*Fine.*
Forte	Loud	*f*
Fortissimo	Very loud	*ff*
Fuoco	Fire, animation.	
Grandioso	Grand style	*Grandº*
Grave	Very slow, solemn.	
Guisto	Strict time.	
Gusto	Elegantly.	
Impetuoso	Impetuously.	
Irresoluto	Irresolutely.	
Larghetto	Slow measured movement.	
Largo	Slower than Larghetto.	
Legato	Smooth, connected.	
Lento	Slow.	
Ma	But.	
Maestoso	Majestic	*Maestº*
Marziale	Martial	*Marzˡᵉ*
Meno	Less	*Men.*
Moderato	Moderate	*Modᵗᵒ*
Molto	Much.	
Morendo	Gradually dying away.	
Mosso	More, much.	
Moto	Agitation.	
Non	Not.	
Obligato	Indispensable.	

Term.	*Signification.*	*Abbreviation.*
Piacere	Will, pleasure.	
Piano	Soft.	*p*
Pianissimo	Very soft.	*pp*
Piu	More.	
Poco	Little.	
Presto	Very quick.	
Prestissimo	The quickest degree of movement.	*Prestᵐᵒ*
Quasi	In the style of.	
Rallentando	Less speed of movement.	*rall.*
Ritard	Ritardation.	*rit.*
Signo	Sign. dal signo, repeat from sign.	*𝄋*
Sempre	Always.	
Spirito	Spirit, lively.	
Sostenuto	Sustained.	*Sostº*
Staccato	Short, distinct.	
Stringendo	Accelerating the degree of movement.	
Subito	Quickly.	*S.*
Tacet	Silent.	
Tempo	Time.	*Tem.*
Troppo	Too much.	
Tutti	To play, to join.	
Vivace	Quick.	
Vivo	Lively.	
Volti subito	Turn quickly.	*V. S.*

Terms with the addition of other words.

Andante ma non troppo	Slow, but not too slow.
Andante cantabile	Slow, but in a singing style.
Andante con molto	Slow, but with emotion.
Andante grazioso	Slow, but gracefully.
Andante maestoso	Slow, majestic.
Andante grave	Slow, solemn.
Andantino sostenuto	Slow and sustained.
Allegro agitato	Quick with agitation.
Allegro assai	Very quick.
Allegro con brio	Quick with brilliancy.
Allegro con fuoco	Quick with fire.
Allegro con moto	Quick with agitation.
Allegro con spirito	Quick with spirit.
Allegro moderato	Moderately quick.
Allegro piu mosso	Rather quickly.
Allegro vivace	Very quick.
Ben marcato	Well marked.
Con forza	With force.
Con brio ed animato	With animation and brilliancy.
Con espressivo	With expression.
Dolce con gusto	Sweetly with elegance.
L'istesso tempo	The same time.
Meno mosso	Less quick.
Meno vivo	Less spirit.
Piu lento	Rather slow.
Piu presto	Rather accelerated.

RUDIMENTS OF MUSIC.

ARTICLE I.

OF MUSIC.

Music is the art of combining sounds in a manner agreeable to the ear; it is divided into two parts. I Melody, II Harmony.

Melody is a combination of sounds which by their elevation, duration and succession serve to form a tune.

Harmony is another combination of sounds which by their spontaneous union serve to form Chords.

ARTICLE II.

OF NOTES AND LINES.

Music is written with seven figures called Notes, they are named from the first seven letters of the alphabet, and are placed upon and between five parallel lines, called the Staff or Stave.

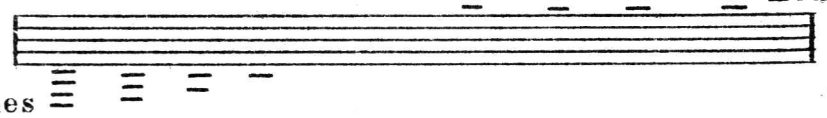
EXAMPLE.

Lines. Spaces.

The lines are counted upwards, the lowest being called the first line.

The spaces are counted the same as the lines. But when the instrument requires a greater compass than the Staff, small lines called Ledger lines are added, under the staff for the lower notes, and over for the upper notes.

EXAMPLE.

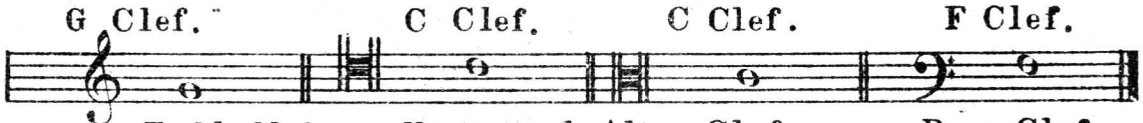


ARTICLE III.

OF CLEFS, THEIR POSITION AND USE.

There are three different sorts of Clefs, namely: the G Clef , the C Clef , sometimes written or , and the F Clef  also written .

These Clefs are familiarly known as:



These Clefs are placed at the beginning of the Staff upon different lines according to the instruments or voices for which they are used. They give their names to the lines upon which they are placed, and serve as starting points to determine the names of the other notes.

ARTICLE IV.

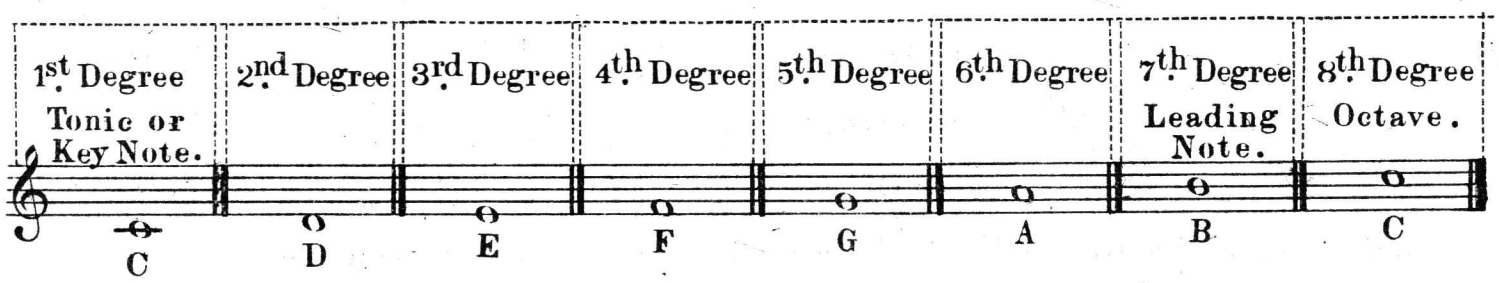
OF THE DIATONIC SCALE.

A succession of sounds from one note to its Octave is called a Scale.

The Scale is composed of eight degrees or notes.

The seven notes of music giving only seven degrees (each note being a degree) a repetition of the 1st. sound is employed to form the Octave or 8th. degree of the Scale.

EXAMPLE.



The word degree must not be confounded with that of tone or semitone (the latter familiarly known as half tone.) *

The tone or semitone is the distance or interval between one degree and the next, whilst the degree is the note itself.

The Scale comprises five tones and two semitones, after the addition of the 1st. sound producing the octave or 8th. note, as in the above example.

It will be seen in Article VI between which degrees of the Scale these tones and semitones are to be found.

When the notes proceed from line to space, or from space to line as in the above example the distance from one note to the next is called a Conjunct or Diatonic Interval from whence it comes that the scale is called a Diatonic scale or Scale by Conjunct Intervals.

When two notes are farther apart from one another, the distance between them is called a Disjunct Interval.

For instance C - D, D - E or E - F are Conjunct Intervals because there is only an Interval of a second from C to D as well as from D to E or E to F.

C - E, C - F, C - G, etc: are Disjunct Intervals because the distance between them exceeds the interval of a second.

---

* The explanation of the words tone and semitone is given in a special article with the different Chromatic Intervals.

ARTICLE V.

S: 1. OF INTERVALS OR DISTANCES (in the natural order.)

As said in the preceeding article, the Intervals derive their name from the distance existing between the notes placed on the different degrees.

Two notes placed on the same degree are called a Unison (see Ex:)

Two notes placed, one on the 1st degree of the scale, and the other on the nearest degree (Line or Space) are called a Second or Interval of a Second.

On the 1st and the 3rd a Third.
, , , , , 5th a Fifth.
, , , , , 7th a Seventh.
, , , , , 9th a Ninth.

and so on to the 10th, 11th, 12th, etc. etc.

On the 1st and the 4th a Fourth.
, , , , , 6th a Sixth.
, , , , , 8th an Octave.

and the same in descending.

EXAMPLE.

INTERVALS IN THE NATURAL ORDER.

S: 2º OF THE INVERSION OF INTERVALS (in the natural order.)

The inversion of an interval consists in making the lower note the higher and vice versa; then a Unison becomes an Octave, a Second becomes a Seventh, a Third becomes a Sixth and so on.

EXAMPLE.

A Unison inverted becomes an Octave, a Second inverted becomes a Seventh, etc.

To be correct in this the number nine must always be obtained. Thus unison becomes octave or 1 and 8 make 9, second becomes seventh or 2 and 7 make 9 and so on.

ARTICLE VI.

OF THE SIGNS OF INTONATION.

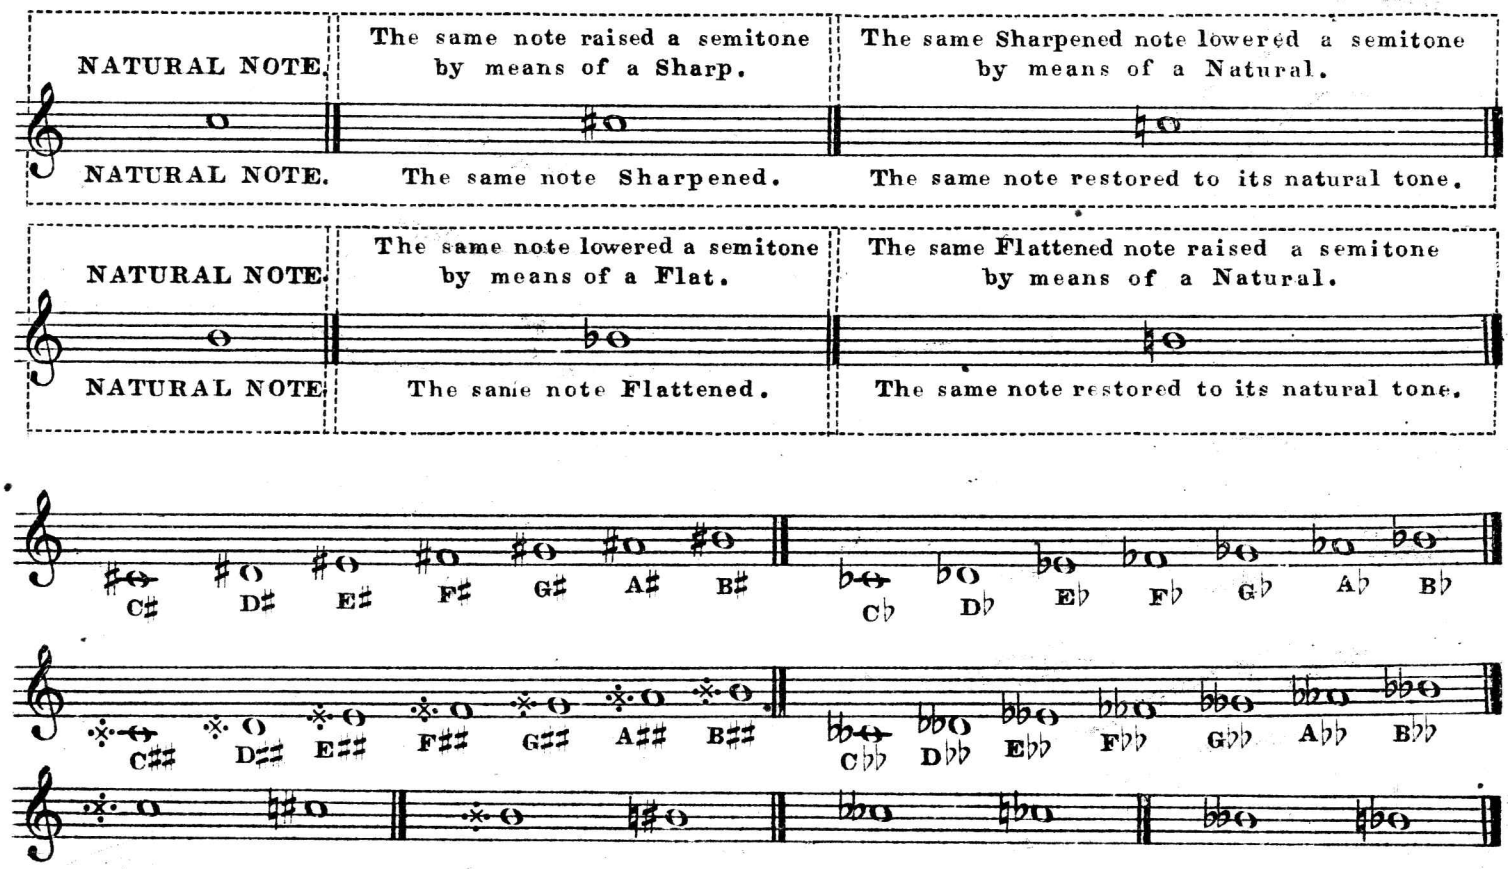
In order to change the order of the semitones at will it has been necessary to add to the seven notes signs, called Sharps ♯ and Flats ♭ which raise or lower by semitones the notes before which they are placed.

A note sharpened or flattened is called Augmented or Diminished. (The French simply call them altered notes.)

EFFECT OF ALTERATIONS PRODUCED BY SHARPS AND FLATS.

SHARP ♯	*Double Sharp* × or 𝄪	*FLAT* ♭	*Double Flat* 𝄫	*NATURAL* (*even sign*) ♮
Raises the note a Semitone.	Raises the note another Semitone above the one already raised by single ♯.	Lowers the note a Semitone.	Lowers the note another Semitone below the one already lowered by single ♭.	Restores the note in both cases Sharp or Flat to its natural sound, position and tone.

EXAMPLE.



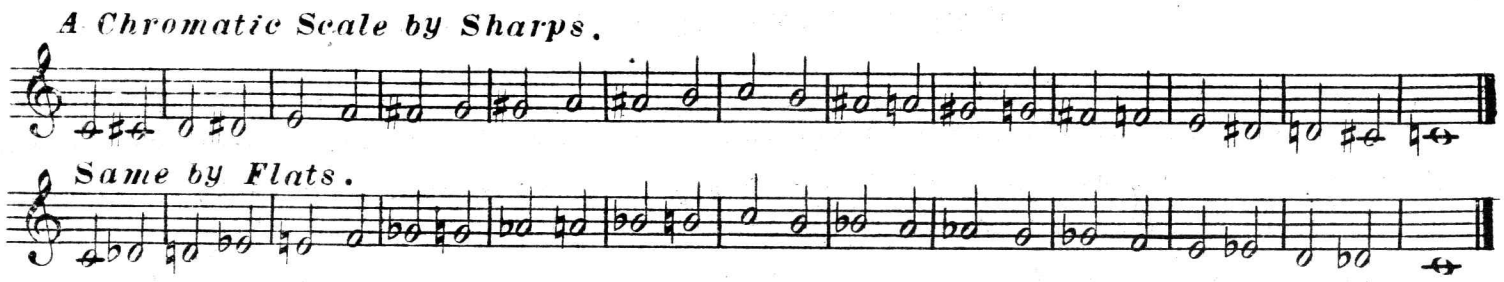
NATURAL NOTE.
The same note raised a semitone by means of a Sharp.
The same Sharpened note lowered a semitone by means of a Natural.
NATURAL NOTE.
The same note Sharpened.
The same note restored to its natural tone.
NATURAL NOTE.
The same note lowered a semitone by means of a Flat.
The same Flattened note raised a semitone by means of a Natural.
NATURAL NOTE.
The same note Flattened.
The same note restored to its natural tone.
C♯ D♯ E♯ F♯ G♯ A♯ B♯
C♭ D♭ E♭ F♭ G♭ A♭ B♭
C𝄪 D𝄪 E𝄪 F𝄪 G𝄪 A𝄪 B𝄪
C𝄫 D𝄫 E𝄫 F𝄫 G𝄫 A𝄫 B𝄫

A scale which proceeds by intervals of semitones by means of Sharps or Flats, is called Chromatic Scale; (The Art 8 will show the numeric order of the seven sharps and flats.)

EXAMPLE.

A Chromatic Scale by Sharps.

Same by Flats.



ARTICLE VII.

OF MODE.

In the compass of the scale there are to be found both tones and semitones; this has given rise to the formation of what is called Mode.

Mode signifies the Union of the three principal sounds which form between themselves a Chord entirely Consonant called *Perfect Chord* (*or Common Chord.*)

This chord is the base and constitution of all music.

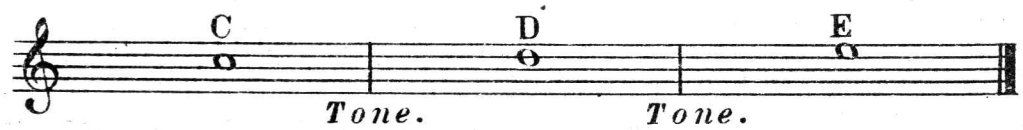
The three principal sounds which constitute the Mode are the Tonic or 1st. Degree, the Mediant or 3rd. Degree and the Dominant or 5th. Degree. (See Art: IV Ex: of the Diatonic Scale.)

By adding the Octave to these three sounds the Perfect or Common Chord is obtained.

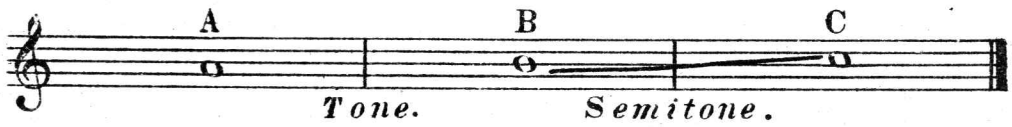
There are two kinds of Mode, The Major Mode and the Minor Mode.

It is always the 1st. third of the Scale which characterises the Mode.

The Mode is Major when there are two full tones in any scale from the 1st. to the 3rd. Degree.

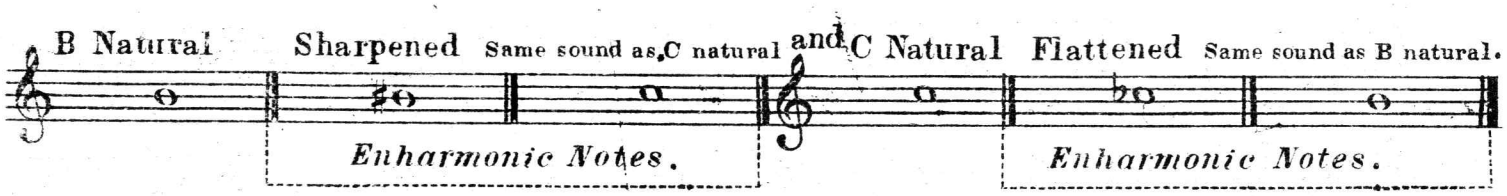


The Mode is Minor when there is only a tone and a semitone from the 1st. to the 3rd. Degree.



REMARK. It is seen that there are two sorts of Intervals of second or Conjunct Degrees in the scale.
One is composed of 2 semitones or full tone (major second) and the other of only one semitone (minor second.)
The minor second is to be known when the 1st. note or degree is sharpened or the second flattened producing the same sound in each case (These notes are called Enharmonic.)

EXAMPLE.

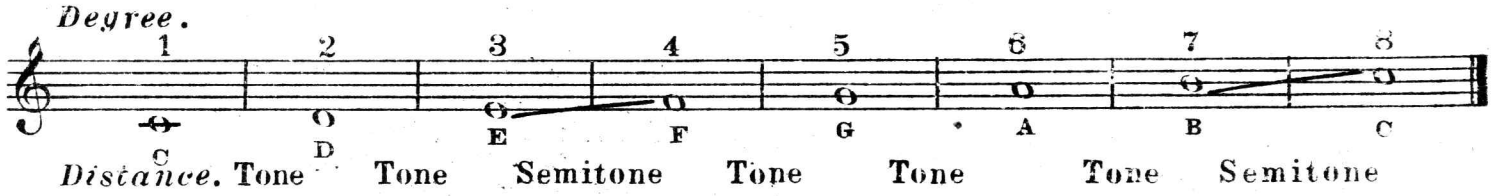


The word *signature* signifies a certain number of Sharps and Flats placed immediately after the Clef.

When neither Sharp nor Flat, consequently no signature is at the Clef, it is a natural Key.

The Key of C Natural Major is the Model of all Major Keys.

Example of the Scale of C Natural Major, with the distances between each degree:



The above Scale is the Diatonic Major Scale proceeding by tones and semitones.

It will be seen that the semitones occur between the 3rd and 4th and the 7th and 8th Degrees of the Scale.

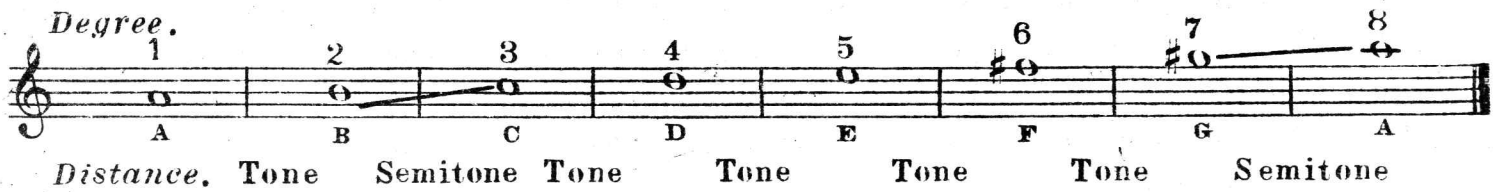
All the other intervals are whole tones making altogether (as mentioned in Article IV) five tones and two semitones in the Diatonic Major Scale.

It is most important to remember that the semitones occur between the 3rd and 4th and the 7th and 8th Degrees in all Major Diatonic Scales on whatever notes they may be founded.

In the Minor Diatonic Scale the semitones follow another order.

The Key of A Natural Minor is the Model of all Minor Keys.

Example of the Scale in the Key of A Natural Minor, with the distances between each degree:



The Minor key is relative to the Major key.

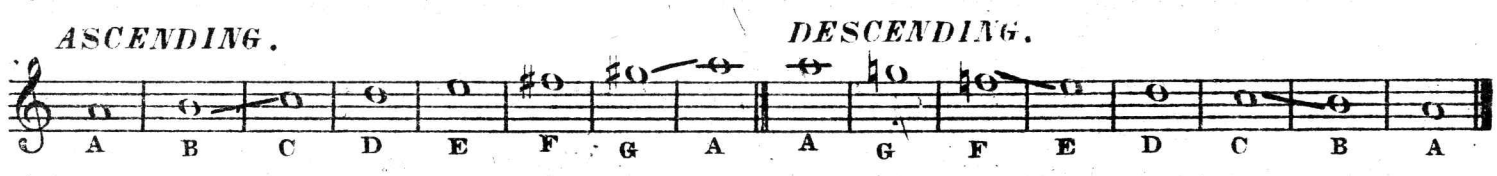
A Minor key has the same signature as its relative Major key, and its scale commences on the 6th Degree of the Major scale thus bringing the 1st third of the Minor scale (a tone and a semitone).

It will be seen in the preceeding Ex: of Minor Scale that the 1st semitone occurs between the 2nd and 3rd Degrees and the 2nd semitone, as in the Major comes between the 7th and 8th Degrees.

It will be found that in every Minor scale the 1st semitone comes in the first 3rd, whilst in the Major scale it comes in the first 4th.

In playing the Minor scale the notes sharpened in ascending become natural in descending.

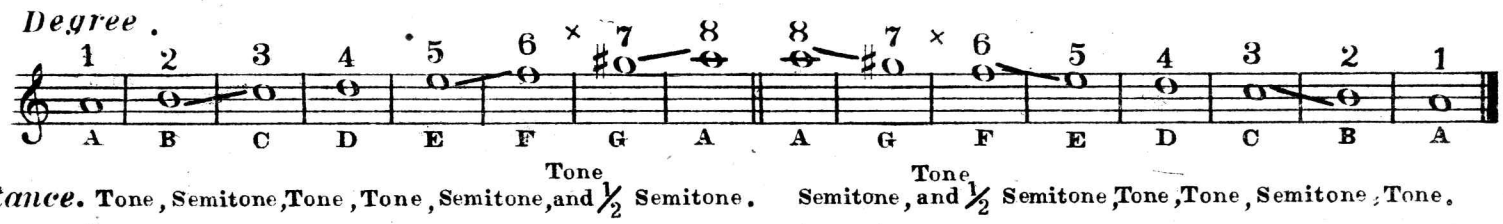
EXAMPLE.



IMPORTANT REMARK CONCERNING THE MINOR SCALE.

By taking its starting point on the 6th Degree of the Major scale, which shows perfectly the 1st Minor third (one tone and a semitone) and by sharpening the 5th Degree of the said Major scale, which, thus sharpened, becomes its 7th Degree or leading note, it is clearly shown that the Minor scale has been formed from the Major scale.

By this means is formed a scale written as follows and much in use in very old Style of Music.



Degree.
1 2 3 4 5 6 × 7 8 8 7 × 6 5 4 3 2 1
A B C D E F G A A G F E D C B A
Distance. Tone, Semitone, Tone, Tone, Semitone, and ½ Semitone. Tone
Semitone, and ½ Semitone, Tone, Tone, Semitone, Tone.

In this scale the note sharpened in ascending remains so in descending.

Although agreeable to the ear and seeming more regular to the eye, yet it is to be seen that this scale contains four tones and four semitones in ascending (which is incorrect) instead of five tones and two semitones (which is correct.)

To obviate the difference which occurs between the 6th and 7th Degrees, it has been agreed to sharpen also the 4th Degree Major, which is the 6th Degree of the Minor scale, thus equalizing the Major and Minor Scales with the only difference mentioned in Art: VII about the 1st semitone.

Observe that the 7th Degree is sharpened in every Minor Scale and that it is the 5th Degree of the Major Scale which is thus sharpened and becomes the leading note of the Minor.

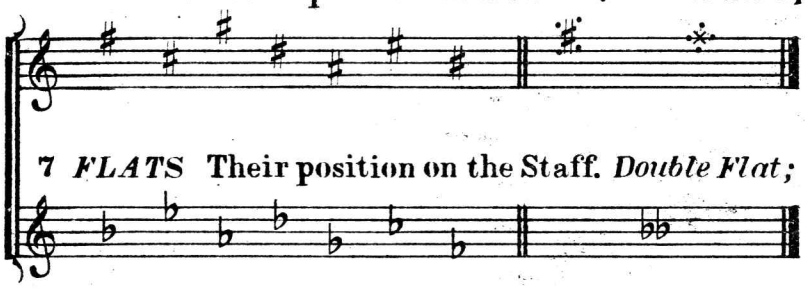
In descending the Minor Scale, one of the semitones is once more inverted and occurs between the 6th and 5th degrees (See Example) by the reason that the notes sharpened in ascending are natural in descending.

(Very imperfect Scale but we must accept what has been intimated by our Masters.)

ARTICLE VIII.

S: 1^{o} OF THE SIGNATURE AND NUMERICAL ORDER OF THE 7 SHARPS AND 7 FLATS.

7 *SHARPS* Their position on the Staff. *Double Sharp;* beginning another series of 7 and following the same order.



7 *FLATS* Their position on the Staff. *Double Flat;* beginning another series of 7 and following the same order.

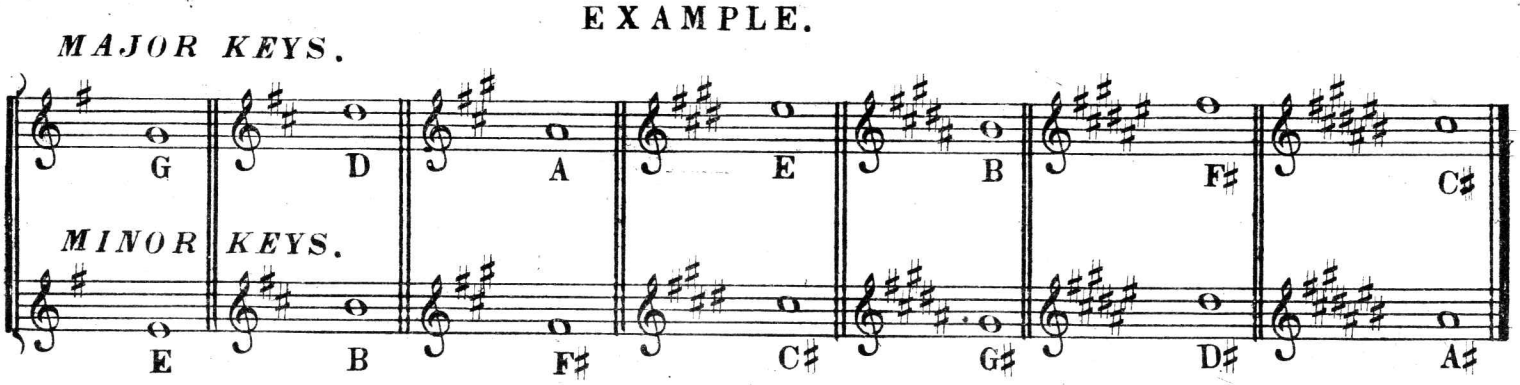
S: 2^{o} EXPLANATION OF THE DIFFERENT MODES (Major and Minor Keys.)

The first sharp is placed on F the 4th degree of the key of G, and the six others from fifth to fifth in ascending order.

The last placed on the clef always becomes the 7th Degree of the key which follows in the Major Mode, and the 2nd Degree of the tone which preceeds for the Minor Mode.

Thus the F sharp points out in the first case the tonic of G Major, and in the second case the tonic of E Minor.

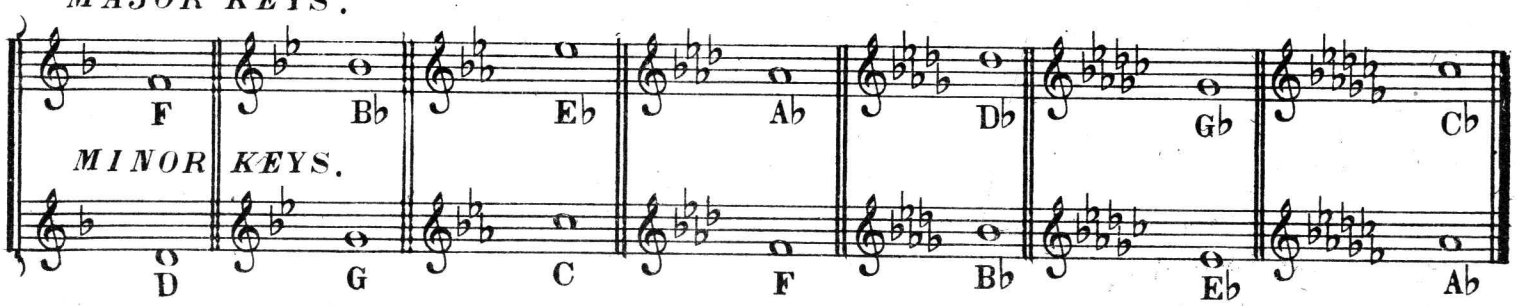
EXAMPLE.



Observe that the second sharp is not placed without the first, and so on with the others.

The first flat is placed on B, the seventh degree of the key of C, and the six others from fifth to fifth in descending order. The last placed on the clef always becomes the 4th Degree of the Major key and the 6th Degree of the Minor key. In the first case the B flat points out the tonic of F Major, and in the second case the tonic of D Minor.

EXAMPLE.



Observe that the second Flat is not placed without the first, and so on with the others.

REMARK. Either sharps or flats, found at the clef as signature, influence the notes placed on the same degrees or at the upper octave, or at the lower octave during the whole of a piece of Music, unless a natural comes accidentally to suspend their effect.

Accidental sharp or flat is available for the whole of one bar only, unless a natural is met with in the course of that bar.

SPECIAL ARTICLE Nº 1.

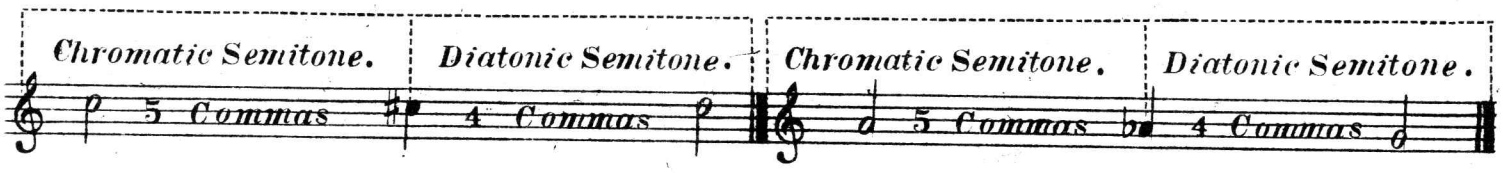
OF INTERVALS, TONES AND SEMITONES.

The tone is an interval composed of nine partial intervals called "*commas*" or of two semitones one of which is Chromatic and the other Diatonic.

The chromatic semitone is composed of five commas and always occurs between two notes of the same name.

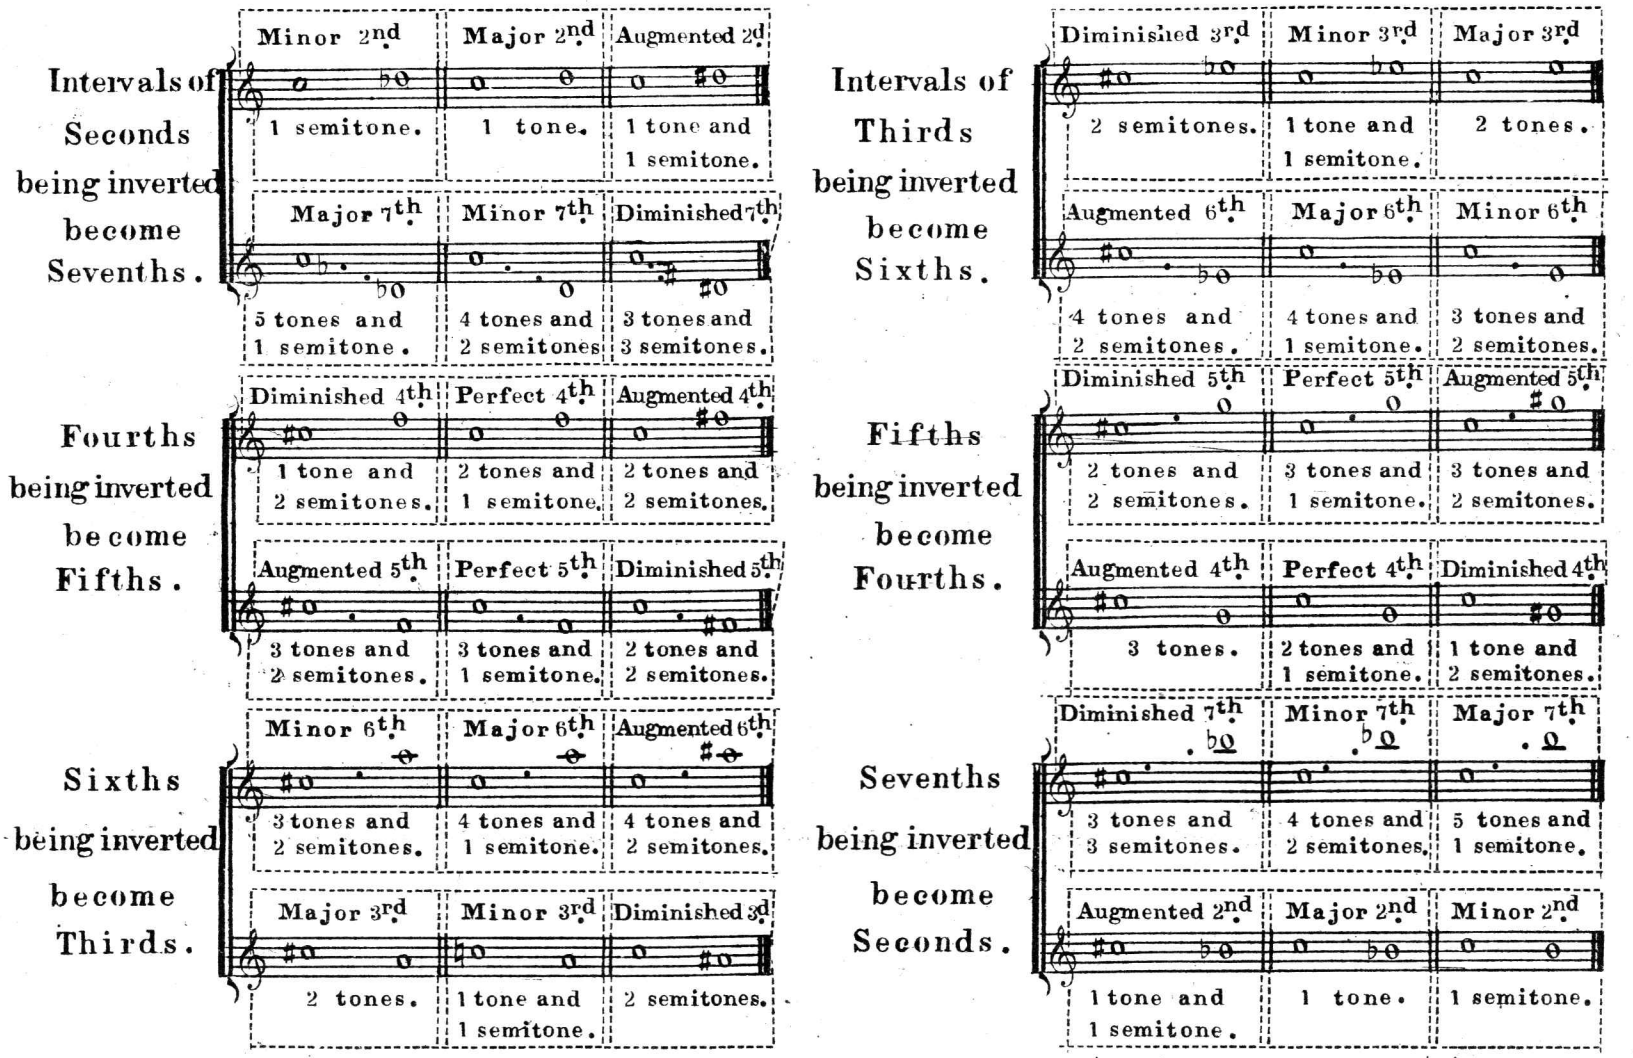
The diatonic semitone composed of four commas always occurs between two notes of different names.

EXAMPLE.



SPECIAL ARTICLE Nº 2.

TABLE OF THE INVERSIONS.



It results from the preceeding table that every Major interval becomes Minor, and every Minor interval Major, when inverted.

Every Augmented interval becomes Diminished and every Diminished interval Augmented.

The Perfect intervals which are the Fourth and the Fifth remain Perfect when inverted.

ARTICLE IX.

OF NOTES AND RESTS.

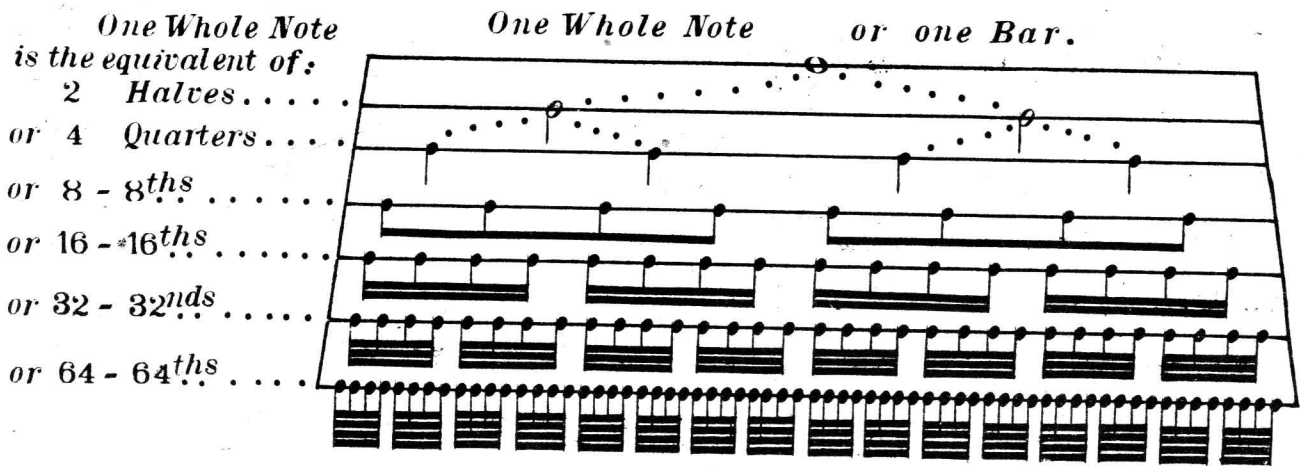
There are seven characters which determine the value of notes. It is from these characters that we learn to know and to measure the time to be given to each of the said notes.

There are also seven rests or silent notes which correspond exactly with the value of the notes.

EXAMPLE OF THE SEVEN RESTS.

TABLE

VALUE OF NOTES.



One Whole Note is the equivalent of:
2 Halves . . . . .
or 4 Quarters . . . .
or 8 - 8ths . . . . . .
or 16 - 16ths . . . . . .
or 32 - 32nds . . . . .
or 64 - 64ths . . . .
One Whole Note or one Bar.

It is easy to see from the above table that the Whole Note is equivalent to two Halves or four Quarters etc, the Halves to two Quarters etc: the Quarters to two 8ths etc: and the 8ths to two 16ths etc. When several 8ths, 16ths, etc: come together they must be joined as below.

EXAMPLE OF CONTRACTIONS OR ABBREVIATIONS IN MUSICAL NOTATIONS.

ARTICLE X.

OF THE DOT PLACED AFTER A NOTE.

The dot serves to increase the preceeding note by half its value; consequently, a Whole Note which equals two Halves is equivalent to three when it is dotted; and so on for Halves, Quarters, 8ths etc. This applies equally to rests.

EXAMPLE.

A Triplet is a group of three notes arising from the division of a note in three equal parts of the next inferior duration, which are to be performed in the time of two such notes.

EXAMPLE.

Sometimes the notes are divided into (5, 7, 9, etc:) equal parts instead of 4, 6, or 8, as usual; in this case a curved line is drawn over it etc: as in the above example.

ARTICLE XI.

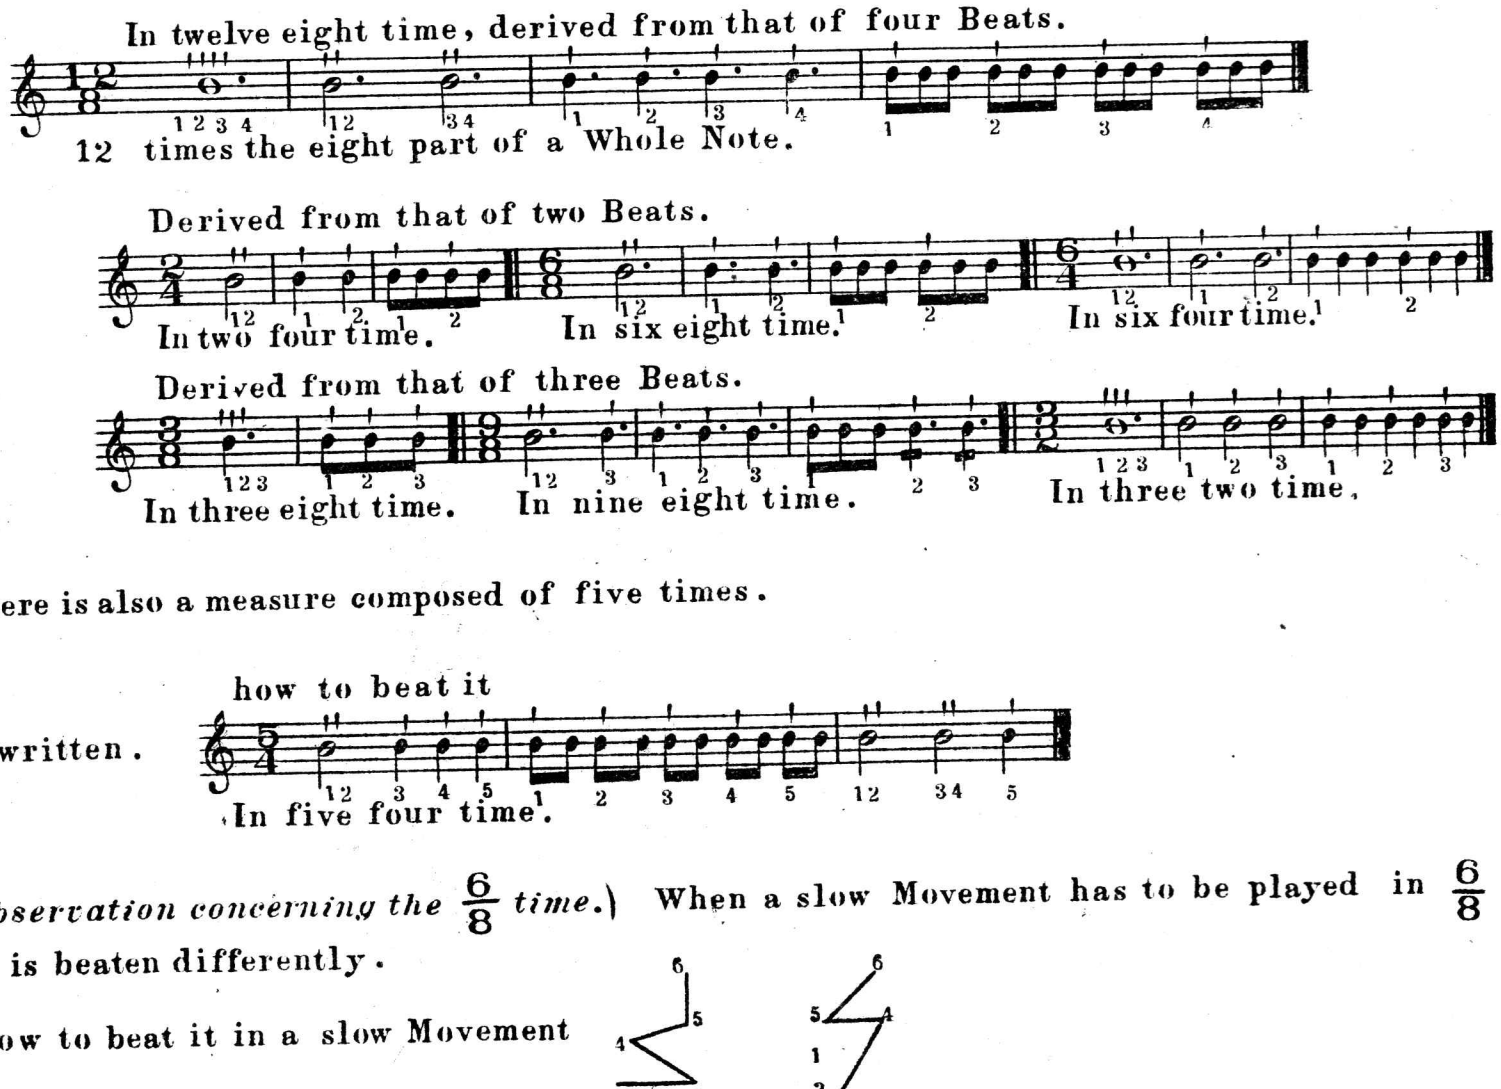
A Musical Composition is divided into equal portions, called Measures or Bars, by short lines drawn across the staff and which are also called bars. Measures in their turn are divided into equal parts called beats.

There are three kinds of measures: that of four beats or Common time indicated by C, that of two beats indicated by ¢ or 2, and that of three beats indicated by a 3 or $\frac{3}{4}$

EXAMPLE OF SIMPLE TIMES.

From these measures are derived many others which are called Compound Times.

EXAMPLE OF COMPOUND TIMES.

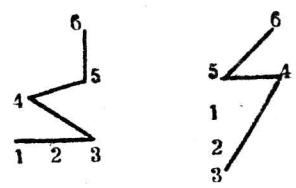


In twelve eight time, derived from that of four Beats.
12 times the eight part of a Whole Note.
Derived from that of two Beats.
In two four time.
In six eight time.
In six four time.
Derived from that of three Beats.
In three eight time.
In nine eight time.
In three two time.

There is also a measure composed of five times.

(*Observation concerning the* $\frac{6}{8}$ *time.*) When a slow Movement has to be played in $\frac{6}{8}$ time it is beaten differently.

How to beat it in a slow Movement



ARTICLE XII.

OF SYNCOPATED NOTES.

A Syncopated Note is one which is divided into two others of less value, and which finishes one beat and commences another.

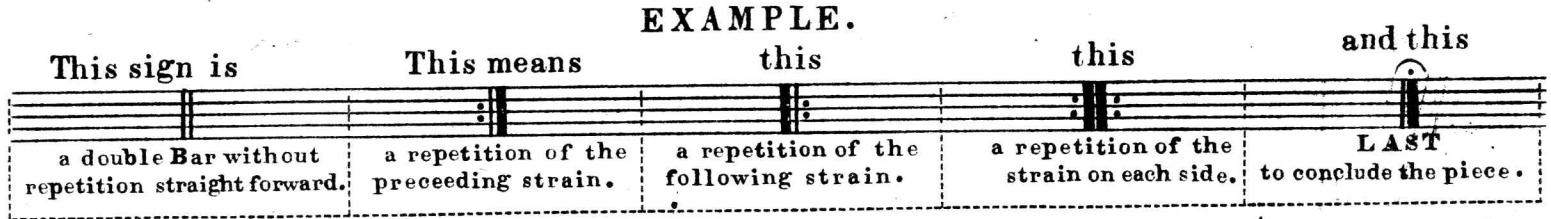
EXAMPLE.

ARTICLE XIII.

OF REPEATS.

To avoid writing the same thing twice, signs called Repeats are employed, the dots showing how often the different *parts* or *strains* are to be played.

EXAMPLE.



This sign is
This means
this
this
and this
a double Bar without repetition straight forward.
a repetition of the preceeding strain.
a repetition of the following strain.
a repetition of the strain on each side.
LAST to conclude the piece.

Da Capo or D.C. means that the piece must be recommenced. This sign 𝄋 means the same, and also refers back to a previous 𝄋.

ARTICLE XIV.

A Pause is marked thus 𝄐 or 𝄒. When this sign is found over a note its value or duration should be increased, and it may be sustained at pleasure, and a prelude or cadenza even executed if thought desirable. This however is only admissible in the first part, and when, in modulating, it happens that the original key has been quitted, it must be adroitly resumed in order to terminate the phrase or return to the melody.

But when the pause is found placed over a rest the note must not be sustained, on the contrary it is the duration of the rest which is prolonged.

EXAMPLES.

ARTICLE XV.

OF SLURRED AND DETACHED NOTES.

In order to render music more agreeable and less monotonous different signs are employed.

This ⌒ called *Slur* or *Tie* shows that the notes which it embraces are to be played smoothly and connectedly with a single stroke of the bow.

When it occurs over two notes in unison they must be united as one note.

This sign ıı called *Staccato* shows that each of the notes over which it is written should be played shortly and crisply stopping the bow on each.

This ⌒ called the *Mezzo staccato* shows that the notes must be separated but in one stroke of the bow.

EXAMPLES.

Slurred. *Staccato.* *Mezzo staccato.*

ARTICLE XVI

OF SIGNS OF EXPRESSION.

In order to give expression to music different signs are employed.

This < shows that the sound must be gradually increased, this > that it must be gradually diminished and this <> that the sound must be increased as far as the middle and then diminished until the end.

To show when to play softly the Italian words *Piano* and *Dolce* are employed.

They are often abbreviated thus *p* or *Dol.* Very softly is marked *pp*.

To show when to play loud the word *Forte* is used, and *Fortissimo* when to play very loud. These two words are abbreviated *f* and *ff*.

To show the gradual increase of sound from soft to loud in a long passage the word *crescendo* abbreviated *cres* is used, and similarly the diminution of sound from loud to soft is shown by the words *Zmorzando* or *Diminuendo* abbreviated *Zmorz* and *Dim.*

The abbreviations *rf*, *sf*, *fz*, *sfz*, *fp* or even *f* over a single note are also employed as signs of expression, > Λ indicate a marked accent on a single note and even on a Chord.

ARTICLE XVII.

OF GRACE NOTES.

(*PORTAMENTO OR APPOGGIATURA OR TURN.*)

A Grace Note is a note smaller than the others, and placed more frequently before than after them.

In the 1st. instance its value is that of half the note which follows and in the 2nd. it borrows its value from the note which it preceeds.

The long appoggiatura ♩ or ♪ is more strongly accented than the following note.

The short appoggiatura 𝅘𝅥𝅯 is played short, and the accent is on the following note.

In all cases appoggiaturas are slurred to the note following.

When several occur together either before or after, they are called a Grupetto or Turn (𝆔) and should be executed more briefly.

Sign used for a Turn with the lowest note made sharp (𝆔♯)

Sign used for a Turn with the highest note made flat (𝆔♭)

EXAMPLES.

EXAMPLES OF GRACE NOTES.

EXAMPLES OF TURN.

The Turn is always performed quickly, and like the other embellishments, is taken in the same bow with the note above or below on which the turn is placed.

Note- The lowest note of a turn is always found a half tone or semitone below the principal note.

The Glissato or Slide must be executed with rapidity, and generally takes its value from the preceding note or rest.

ARTICLE XVIII.

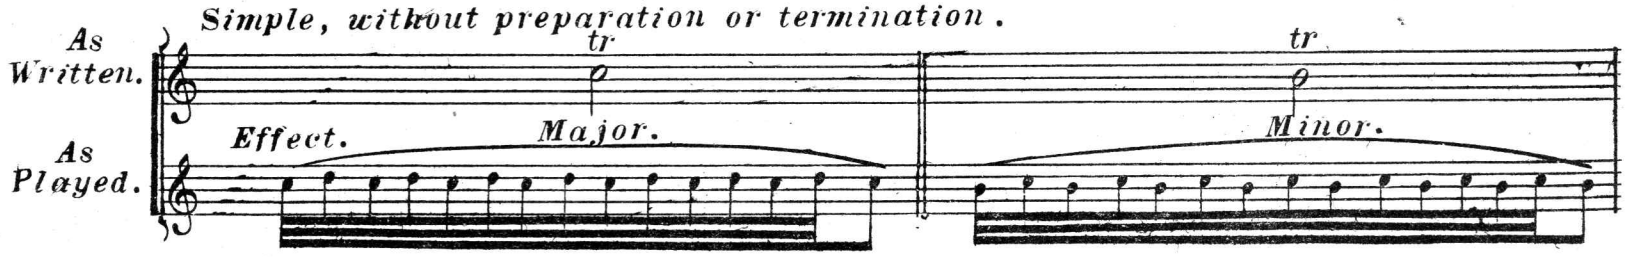
OF THE SHAKE OR TRILL.

The *Shake* or *Trill* is an effect produced by the rapid and equal alternation of two notes, the distance between them never being more than a tone for the Major Mode and a semitone for the Minor Mode. It is marked by *tr* which is an abbreviation of the word *Trill*.

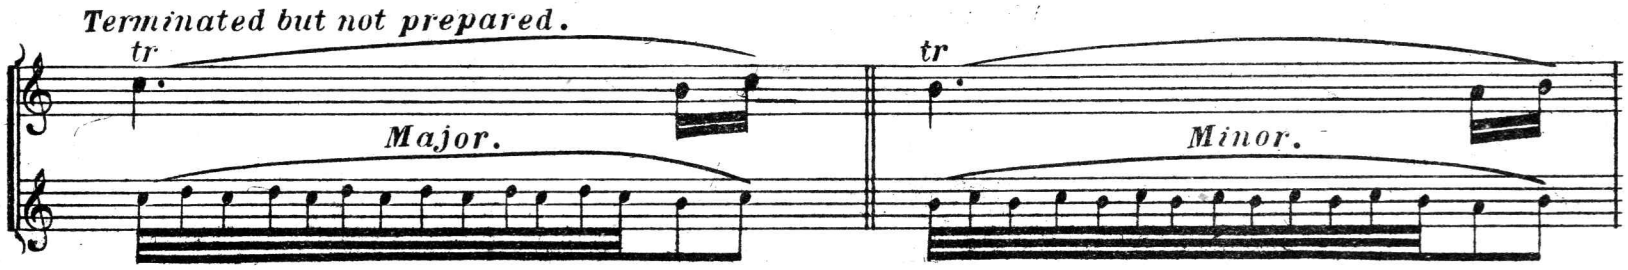
There are several ways of employing *Shakes*, some being simple and introduced without preparation or termination, whilst others are both prepared and terminated.

EXAMPLE.

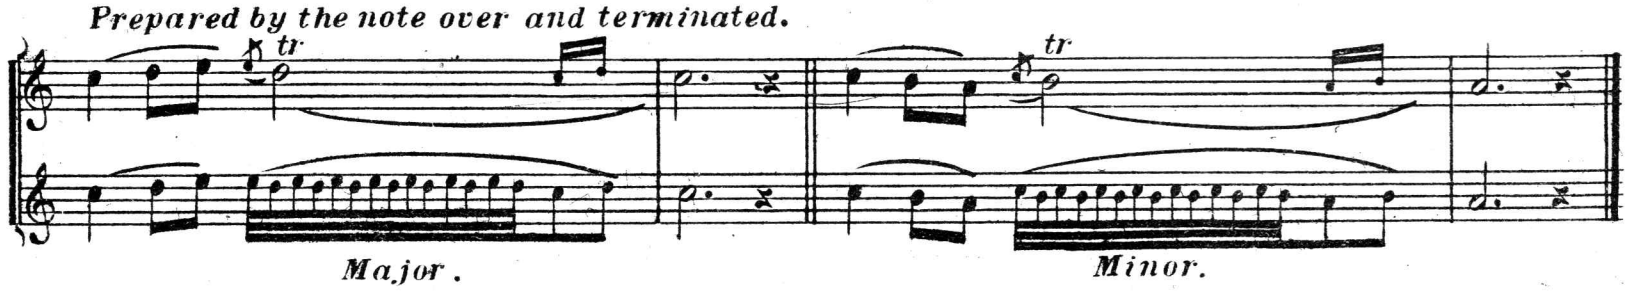
Simple, without preparation or termination.



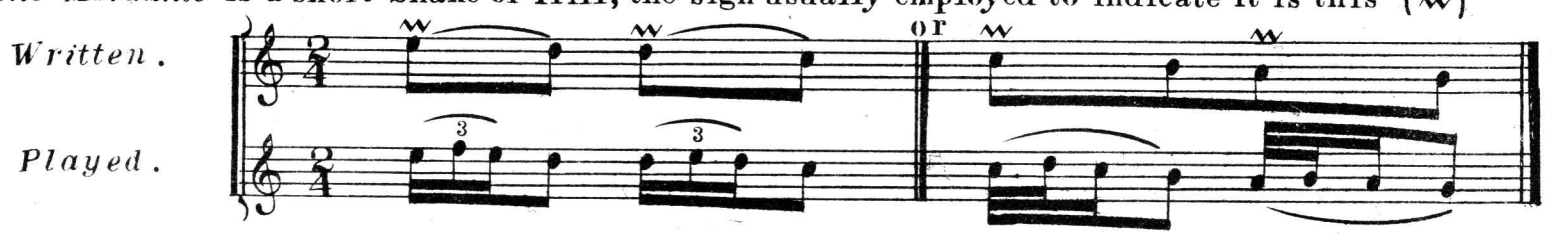
Terminated but not prepared.



Prepared by the note over and terminated.



The Mordante is a short Shake or Trill, the sign usually employed to indicate it is this (𝆔)



ARTICLE XIX.

ABBREVIATIONS.

Bis - This term signifies that the bar, or bars included within the same curve drawn over, or under the bars, are to be played twice, before proceeding to the next bar, or bars.

EXAMPLES.

By playing the first bar twice, we have four bars in the strain.

By playing the first two bars twice we have eight bars in the strain.

THE BANJO.

Music for the banjo is always written in the Treble Clef, but the real sounds or tones will be found an octave lower than written.

BANJO STRINGS.

None but the best strings should be used. The first, second, third and fifth strings are Gut,____the fourth is silver plated copper wire wound on fine silk,____The first is a thin string manufactured expressly for the banjo___for the second use a light violin E__for the third use a heavy violin E or a very light violin A___the fourth like the first is made expressly for the instrument___the fifth is the same as the first string.

THE HEAD.

A Calf skin head of medium thickness should be selected,__some performers prefer all white others all clear heads,__but as heads may be made all white or clear by artificial process the author has always found it safest to use heads that are part white and part clear. Great care must be exercised in putting on a head.___It should not be allowed to remain in water to soak, by so doing the head is ruined and not fit for use.___The best plan is to roll it in a wet cloth long enough to take out the crispness and to admit of the edges being easily turned without breaking___Having dampened the head, lay it across the rim, put on the wire flesh hoop__place the top band or hoop over this, pull the edge of the head up under the top hoop and over the wire flesh hoop,___put on a hook to hold the band in place,_pull the head up and put a hook on opposite the first one. Having gone around the banjo and placed on enough hooks to hold the head in place, a pair of plyers should be used to pull the edge of the head up all round the rim. Having done this, the remainder of the hooks can be put on, the head should then be drawn tight, evenly and by degrees, by turning each nut once or twice until the hoop is nearly even with the top of the rim, with a sharp knife trim the head even with the top of the hoop and allow the banjo to remain as it is a day or two before drawing the head tighter.

Should the head become soiled it can be cleaned by rubbing over the soiled part lightly with a wet cloth or sponge, removing the stains and then going over the head with a wet damp cloth and finish with a dry towel. Set the banjo aside for a short time and it will dry, leaving the head bright and as good as new or, in the authors opinion a better plan is to go over the head with an ordinary rubber pencil eraser, removing the stains as pencil marks are removed from paper.

THE BRIDGE.

Light bridges made of cedar or pine wood produce a short sharp tone, bridges made of Ebony, Boxwood, Ivory or other hard substances produce a more full and melodious tone.

A narrow rim also produces a sharp tone while a deep rim produces a full round and sonorous tone.

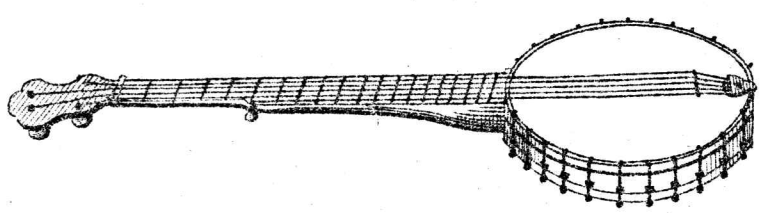
The banjo being a sensitive instrument is easily affected by extremes of cold or heat. It should not be kept too near a register or stove, or in a very damp room.__ When not in use the banjo should be kept in a bag or case.__Before placing it in the bag remove the bridge.

SIZES OF BANJOS.

Banjos vary in size from seven to thirteen, and in rare instances fourteen inches in diameter, with necks or handles from sixteen to twenty one and a half inches in length from rim to nut._____ The average ladies or parlor banjo is eleven, and the concert eleven and a half or twelve inches in diameter.___ Persons about to begin the study of the banjo should select one they can best handle,____a performer having small hands could not stop the chords or make the positions on a large banjo while one with large hands would find it awkward to use a small instrument.

FRETS.

The finger board is divided by strips of metal or wood used as guides crossing it at right angles with the strings, these guides are called frets, they may be raised like those on a guitar or inlaid with narrow strips of light wood or ivory etc__both kindsare used, but the professional player generally has dots or guides inlaid on the upper side of the handle, leaving the fingerboard plain with the exception of dots or ornaments inlaid at the principal positions; for the amateurs the inlaid frets are prefered, as they admit of more rapid execution and peculiar banjo effects which cannot be produced upon an instrument having raised frets.___ It is only of late years that any frets at all are used on the banjo.



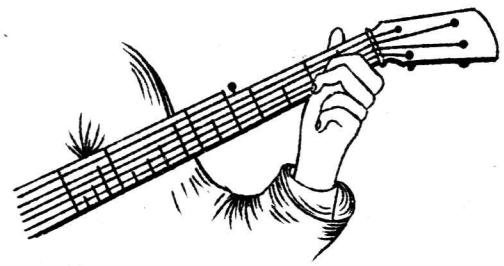
HOW TO FRET A BANJO.

Divide the distance between bridge and nut into 18 parts, and at one eighteen from the nut place the first fret.—Divide the distance from 1st fret to nut into 18 parts and at one eighteenth from the first fret place the second fret.—Divide the distance from 2d fret to bridge into 18 parts and at one eighteenth part 2nd fret place 3rd fret and so on until there are as many frets as desired.

HOW TO HOLD THE BANJO.

The performer should sit in a natural, easy position, the hoop or rim resting on the right thigh close to the body, the neck or handle held lightly in the left hand, between the thumb and forefinger, and elevated so as to come nearly opposite the left shoulder.—The fingers of the left hand should fall endwise upon the strings, stopping them firmly.

POSITION OF THE LEFT HAND.



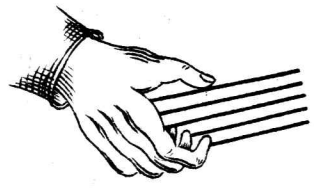
The signs for left hand fingering are placed over the notes. 0 denoting open strings (without stopping it with a finger of the left hand.) 1 denotes first finger, 2 second finger, 3 third finger and 4 fourth (little) finger.—It sometimes becomes necessary to sound notes with the left hand, the signs 1 2 3 or 4 denote that the notes over which they are written must be sounded by pulling them with the fingers of the left hand indicated in the half circle.

RIGHT HAND.

The right arm should rest on the rim of the banjo so as to bring the wrist an inch or two in front of the bridge.—There are two styles of playing the banjo.—The banjo style and the Guitar style.—In the banjo style of playing which is generally used for Marches, Jigs etc, a thimble or shield is worn over the first finger nail. The hand should be partly closed—the first finger projecting a little in advance of the others.

The thumb slightly bent over the 5th string, the first finger over the first string, strike the strings with the first finger and pull them with the thumb.—The figure 1 below a note denotes that it is to be struck with the first finger, the sign × placed under a note denotes that it is to be pulled with the thumb. The position of the fingers of the right hand is never changed in playing the banjo style.

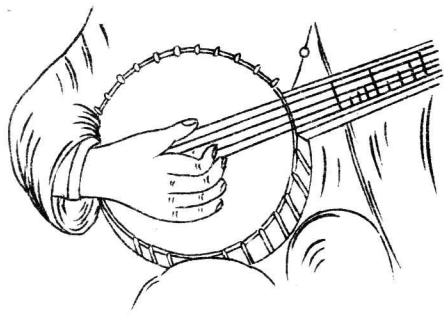
POSITION OF THE RIGHT HAND IN THE BANJO STYLE.



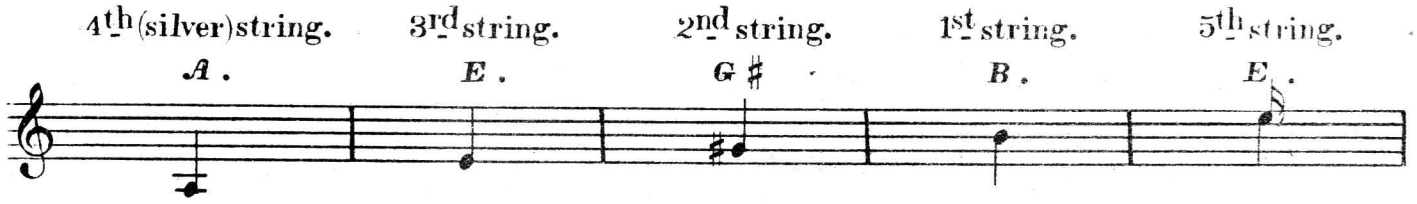
In the Guitar style of playing, the right arm should rest on the rim the same as in the Banjo style. — *Do not rest the little Finger on the head* as it cramps the hand and prevents free use of the fingers. The thumb, first, second and third fingers are used in manipulating the strings. The thumb sounds the fourth and fifth strings. The first finger sounds the third string, the second finger sounds the second string and the third finger sounds the 1st string, pick the strings with the ends of the fingers and avoid touching them with the nails. —

The strings should be struck so that they will vibrate across the finger-board.

POSITION OF THE RIGHT HAND, GUITAR STYLE.



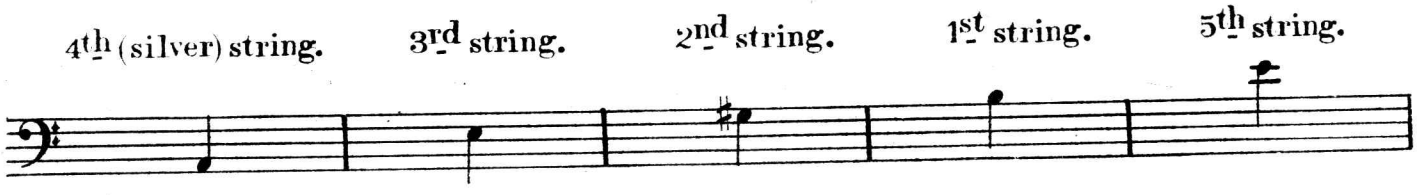
When in tune the open strings are named as follows.



E in the 4th (upper) space can be made on the first string at the fifth fret or on the fifth string open. — When it is to be made on the fifth string it is indicated by having a double stem thus

TUNING THE BANJO BY EAR.

Tune the 4th string to A or as near as you can get it. Stop the 4th string at the 7th fret making E and tune the 3rd string to it. — Stop the 3rd string at the 4th fret making G ♯ and tune the second string to it. stop the second string at the 3rd fret making B and tune the first string to it. Stop the first string at the 5th fret making E and tune the 5th string to it. As before mentioned all music for the banjo is written in the Treble Clef, but the real sounds or tones are an octave below where written, when tuning the banjo with piano the different strings should be tuned to the following notes.



The common chord of A Major, 3 sharps (called the natural key of the banjo, because easiest of execution) is formed by placing the first finger of the left hand on the 2nd string at the first fret, making A, the second finger of the left hand on the first string at the second fret making C ♯ and sounding the first, second, third and fourth strings together.

The open strings, omitting the fourth from the common chord of E Major 4 sharps. When tuned as per above example the banjo is said to be tuned in E and A Major. It has become customary for teachers of and writers of the banjo to name the key to which the instrument is tuned from the note to which the fourth string is tuned and the common chord that is formed by holding the natural position, — according to this method of noting the key the banjo would be in A major when tuned as per above example.

NATURAL POSITION.

The left hand is said to be in its natural position when the first finger is on the second string at the first fret and the second finger on the first string at the second fret.

It is to be regretted that the system of tuning in E and A Major has been universally adopted as being the standard or concert pitch of the banjo.

When music was first written for it, the banjo was made with very long neck. The strings also, were much thicker than those now used.—The modern banjo has been much improved, the neck has been shortened and thin strings are made expressly for it. the lengthening of the banjo neck has the same effect as increasing the thickness of the string, therefore the modern banjo with short neck and thin strings when tuned to the same pitch as the old banjo loses that brilliancy of tone for which it is so much admired by all lovers of music.

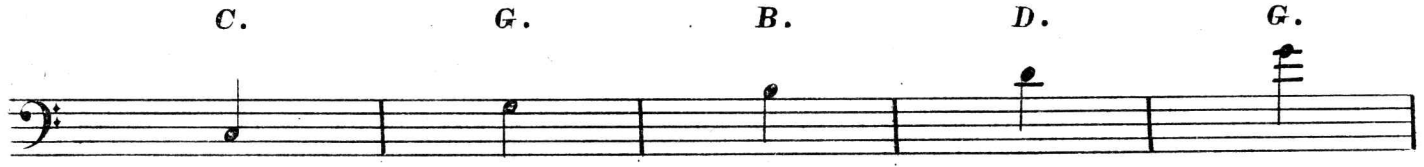
To change the system of notation would at this late date be impraticable as it would cause confusion among learners and lead to endless controversy between writers for and teachers of the instrument; those using eleven inch banjos would advocate G & C as concert pitch,—those using ten inch banjos would advocate D & A and thus on *ad infinitum*.

It has become the custom among performers to tune their banjos in the key best suited to the size of instrument they use.—Banjos with rims of from 11 to 12 inches in diameter, necks 19 to 19 $\frac{1}{2}$ inches in length can be tuned in G & C Major.—Smaller instruments, are tuned in D & A Major and larger ones in B♭ & F Major.—It will thus be seen that if the banjo is tuned in G and C Major and plays a piece in A major, while it would be played in the latter key, the sound would be in C Major. If a piano or orchestral accompaniment were to be played to a banjo Solo in E and A Major, it would be necessary to have the piano and Orchestra parts in G & C Major with the banjo tuned in C Major. In tuning to G & C Major the Banjo 4 th string is tuned to C, but noted as A. 3 rd string to G, noted as E. 2 nd string to B, noted as G♯. first string to D noted as B and fifth string to G, but noted as E.—Thus each note in the scale is noted a third lower than its real sound.

For C Major tune the Banjo to the following notes on Piano.

4th (silver) string. 3rd string. 2nd string. 1st string. 5th string.

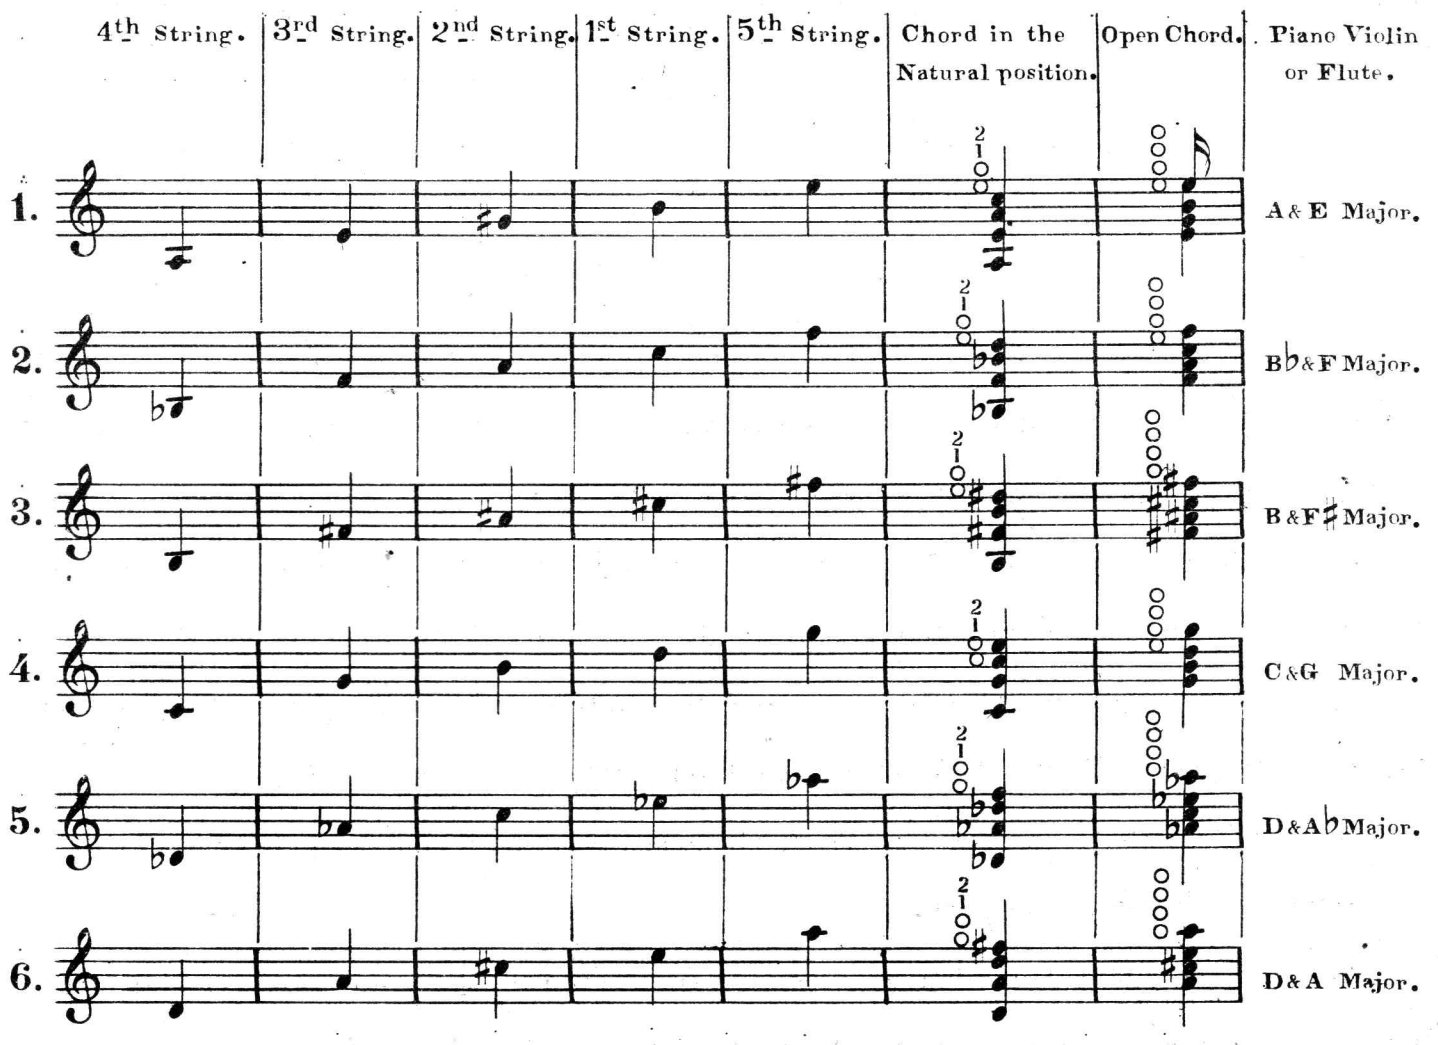
C. *G.* *B.* *D.* *G.*



To tune in G & C Major to Violin, tune Banjo 3rd string to Violin G (4th), Tune fourth string a 5th below third.—Second string a third above third string.—First string a 5th and the 5th string an octave above 3rd string.———

The following Diagram will assist the beginner to tune the Banjo in the different Keys.

At the end of each line is given the Key in which the Piano or other instrument on which C is noted as concert pitch should play while the banjo is being played in A & E Major.



The learner should bear in mind when tuning with Piano that the notes on Piano. to which the banjo is to be tuned are an octave lower than the above.

It is left to the learner to determine which Key is best suited to his or her Banjo. 12 ½ and 13 inch Banjos are generally tuned in A or B♭ ____ lines 1 & 2 ____ 11 and 12 inch Banjos in B.C. or D♭ ____ lines 3, 4 & 5, smaller banjos can be tuned as per line 6.

Should the performer wish to play with Flute, Violin, Piano, Guitar or any instrument that is played from the standard pitch C and the banjo were tuned as per line 1 which being concert pitch for the banjo the performer would play in the same Key with the other instrument but it may sometimes become necessary to tune the banjo to a key to suit the instrument, with which it is to be played. ____ (for example) _____

Take a song with Piano accompaniment in C Major, ___ the performer wishes to play the Melody on the banjo with piano accompaniment without transposing or rewriting the Piano part this can be done in two ways, ___ first, by tuning the banjo in E and A Major and playing the melody in the same key with Piano (but as before stated this would make the banjo sound flat) or second, by tuning the banjo in G and C Major and transposing the banjo part (Melody) as many semitones lower as the instrument has been tuned higher than Banjo concert pitch

In this case the banjo part should be transposed to A Major (3 sharps) four semitones below C Major and played with the piano part in C, ___ thus the piece would be played in A Major on the banjo, but would sound in C Major, the key in which piano part is being played. ____ If the song is in F Major (one flat) tune banjo in G and C Major and transpose Melody to D Major, (2 sharps) four semitones below, leaving Piano part in F.

Should the song and piano accompaniment be in G Major (one sharp) tune banjo in G & C Major and transpose Melody to E Major, (4 sharps) four semitones, below piano.

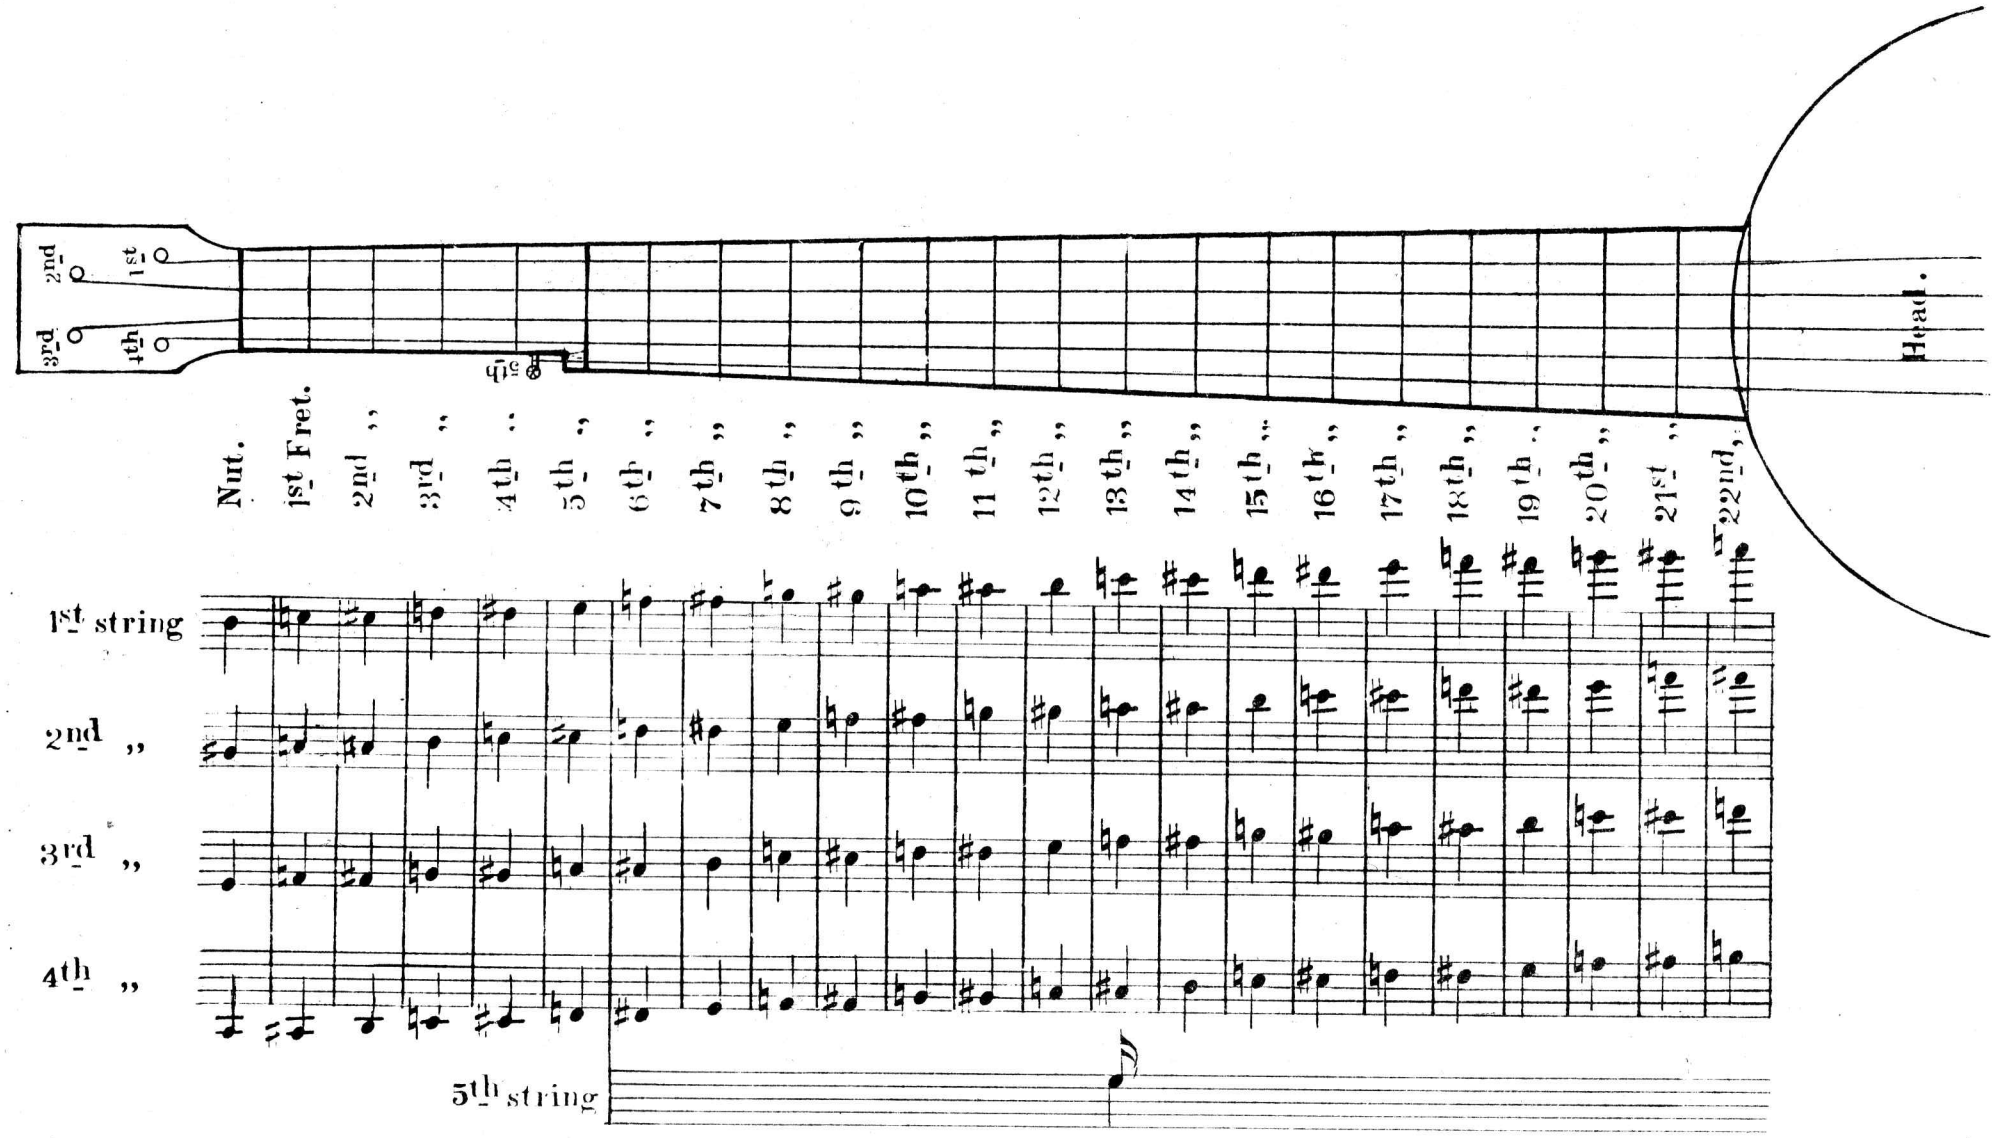
If Melody is in E (3 flats) tune banjo to G & C and transpose the piece to C Major four semitones below piano part. _____

This rule can be followed throughout all the Keys taking care to transpose the Melody as much lower as the banjo has been tuned higher than Banjo Concert pitch.

Each fret upon the fingerboard of the Banjo represents a semitone, thus, 4th string open is A,—— 4th string stopped at 1st fret is A♯ stopped at 2nd fret B♭, — 3rd string open is E, — stopped at 1st fret E♯ or F♭, stopped at 2nd fret F♯ &c.&c.

The fingerboard of the Banjo.

(Showing the notes on all the strings at each fret)



In the Chromatic Scale following, the letter F following a numeral below the notes signifies fret, the figure denoting the fret at which the string is to be stopped to make the desired note. ____O denotes open string, 1 first fret: 2 second fret etc.etc.

CHROMATIC SCALE WITH SHARPS ASCENDING.

4th (silver) string. 3rd string. 2nd string.

1st STRING.

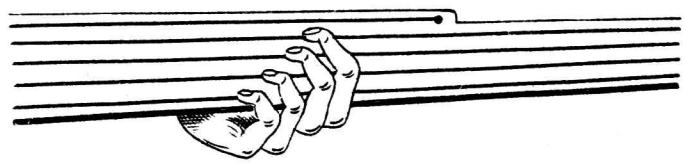
POSITIONS.

There are as many positions as there are frets upon the fingerboard. The fret at which the first finger is placed determines the number of the position. Positions are indicated by numerals followed by an asterisk, they denote that the first finger is to be used at the position indicated by the numeral.

THE BARRE (BAR.)

The Barre is formed by pressing the first finger firmly across two or more strings at the same fret, leaving the remaining fingers free to stop the strings as may be required. In the Barre, the thumb must be kept at the back of the neck of the banjo opposite the first finger to aid that finger in pressing the strings so firmly that no vibration of the strings between the finger and the nut will be perceptible.

POSITION OF THE LEFT HAND IN MAKING A BARRE.



LEFT HAND FINGERING.

o Denotes open string without stopping the string with a finger of the left hand.

1 Denotes first finger—2 second finger—3 third finger and 4 fourth (little) finger.

CHORDS.

№ 1. is called the "Natural Position" because it is the position in which the fingers will naturally fall when the banjo is properly held in the left hand. 2nd finger on first string at 2nd fret, 1st finger on 2nd string at 1st fret,—3rd and 4th strings open.

№ 2. 4th finger on first string at 3rd fret,— 2nd and 3rd strings open,—2nd finger on 4th string at 2nd fret.

№ 3. First finger across 1st 2nd and 3rd strings at 5th fret,—4th string open.

№ 4. First finger across 1st 2nd 3rd and 4th strings at 5th fret,—4th finger on first string at 7th fret,— 3rd finger on second string at 6th fret.

№ 5. First finger across 1st 2nd 3rd and 4th strings at 7th fret,—4th finger on first string at 9th fret,— 3rd finger on second string at 8th fret.

№ 6. First finger on second string at 8th fret,—2nd finger on 3rd string at 9th fret,—4th finger on first string at 10th fret,—4th string open.

HARP CHORDS.

The notes of the Harp Chord are played in rapid succession from the lowest note upwards.

HARP CHORDS.

In the two last examples sound the lower A with the right hand and immediately slur it to C♯ with the fourth finger of the left hand,—this must be done very rapidly to make the note of the Chord sound connected.

SCALES, EXERCISES Etc.

The pupil should be perfectly familiar with all the scales and learn to stop at sight, any note whether it be Sharp, Flat or Natural.—Constant and diligent practice only, will enable the learner to become a master of the instrument.—The left hand fingering which is placed above the notes in the scales, exercises and pieces should be carefully studied.—With imperfect fingering it is impossible to become a good performer.—Bar will be used as an abreviation of Barre throughout this work.

In the exercises and pieces following the figures below the notes indicating the frets will not be given, but where necessary, the right hand fingering in the Banjo style of playing will be placed below the notes, _____ the Sign X denoting the thumb and the figure I the first finger.

The right hand fingering in the Guitar style does not change, as before stated, the first finger picks the third string, the second finger the second string, the third finger the first string and the thumb the fourth and fifth strings. _____ In the latter style of playing, avoid touching the strings with the finger nails, _____ the ends of the fingers should be used in picking and the strings struck in such a manner as to cause them to vibrate across the fingerboard.

If the strings are picked up they will snap against the fingerboard and sound harsh and unmusical.

The following exercises are all carefully fingered and the pupil should practise them diligently, beginning by playing them slowly at first and increasing the time until they can be executed with the utmost rapidity.

Care must also be taken in learning to execute the "snap" (indicated by figures in a half circle 1 2 3 4) and slurred notes, where two or more notes occur on the same degree of the staff, they are played with two fingers of the right hand.

The pupil is advised against jumping from one piece to another, _____ as the pieces and exercises are arranged progressively, it will be found much better to thoroughly learn one piece before attempting a second. _____ By referring to the diagram of the finger board it will be seen that the notes on the strings at the different frets from the 12th to the 22nd are an octave higher than those from the nut to the 12th fret. _____ the natural Chord (A Major) comprising the notes A. E. A. C♯ can be played an octave higher by placing the first finger across the 1st 2nd 3rd and 4th strings at the 12th fret and stopping the 2nd string at the 13th fret with the second finger, the 4th finger on the first string 14th fret.

EXAMPLES.

EXERCISES, PIECES ETC. PROGRESSIVELY ARRANGED.

EXERCISE 1 (4 Beats or Counts to each measure.)

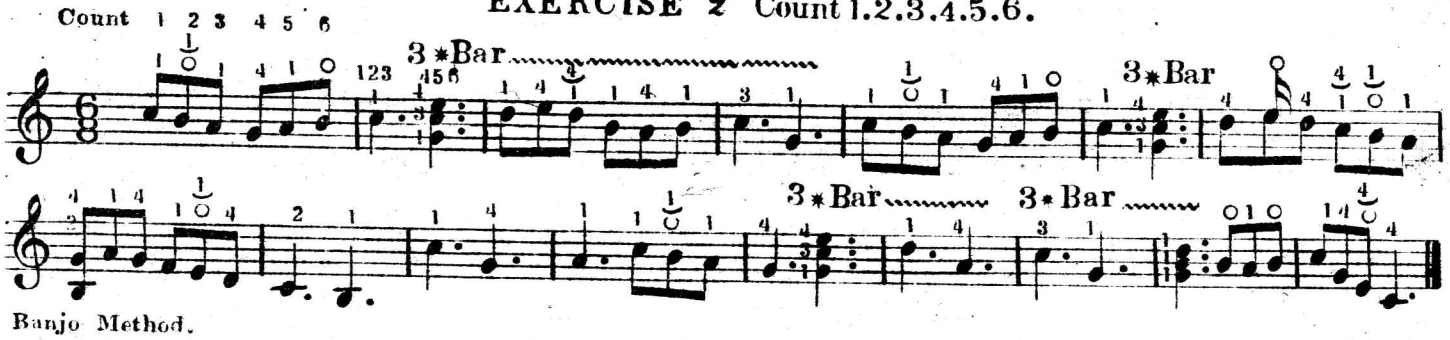
In the following exercise the "snap" note is introduced, ___ the second note in the first measure is fingered thus $\frac{1}{0}$, ___ the first note is stopped in the usual manner with the first finger of the left hand on the first string at the first fret, ___ having picked the string with the right hand making the note C the string is pulled with the first finger of the left hand making B. ____

In the second measure having made C on the first string, ___ place the first finger across the strings at the 3rd fret, 3rd finger on the second string at the fourth fret, the 4th finger on the first string at the 5th fret making the Chord G.C.E. marked 3*Bar. ___ Having played the Chord, take the third and fourth fingers off, leaving the first finger in the position taken, ____ In 3rd measure play D which is being held by the first finger, ___ place the 4th finger on first string at 5th fret, pick the string with right hand and pull the string with the fourth finger of the left hand making D, ___ B in this position is on second string at 3rd fret, A on 3rd string at 5th fret. ____

C in 4th measure is again made on the 2nd string at the 4th fret with the 3rd finger and G in the same measure on the 3rd string at the 3rd fret ___ the first finger should hold the position across the strings without being removed from the chord in second measure to G in the 4th measure

In 7th measure stop C on first string at first fret with first finger and D on same string at the 3rd fret with the fourth finger, ___ pick D with right hand and pull the string with 4th finger left hand making C, which is held with first finger, ____ after pulling the string with 4th finger making C, pull the same string with first finger making B open, ___ 12th measure take 3*Bar as in second measure, hold the first finger in position 12th 13th, 14th and first Chord in 15th measure. _____ In 13th measure D is made on 1st string at 3rd fret A on 3rd string at fifth fret. _____ In 14th measure D is made on 2nd string at 4th fret with 3rd finger. _____ C on 3rd string at 3rd fret, ____ 15th measure G. B. D. are on 1st 2nd and 3rd strings at third fret.

EXERCISE 2 Count 1.2.3.4.5.6.



The difficulty experienced by beginners in executing rapid passages upon the 1st string has often suggested the practicability of the more frequent use of the 5th string fingering it where necessary and using the usual double stem to denote that the 5th string is to be us--ed,_____ thus,_____

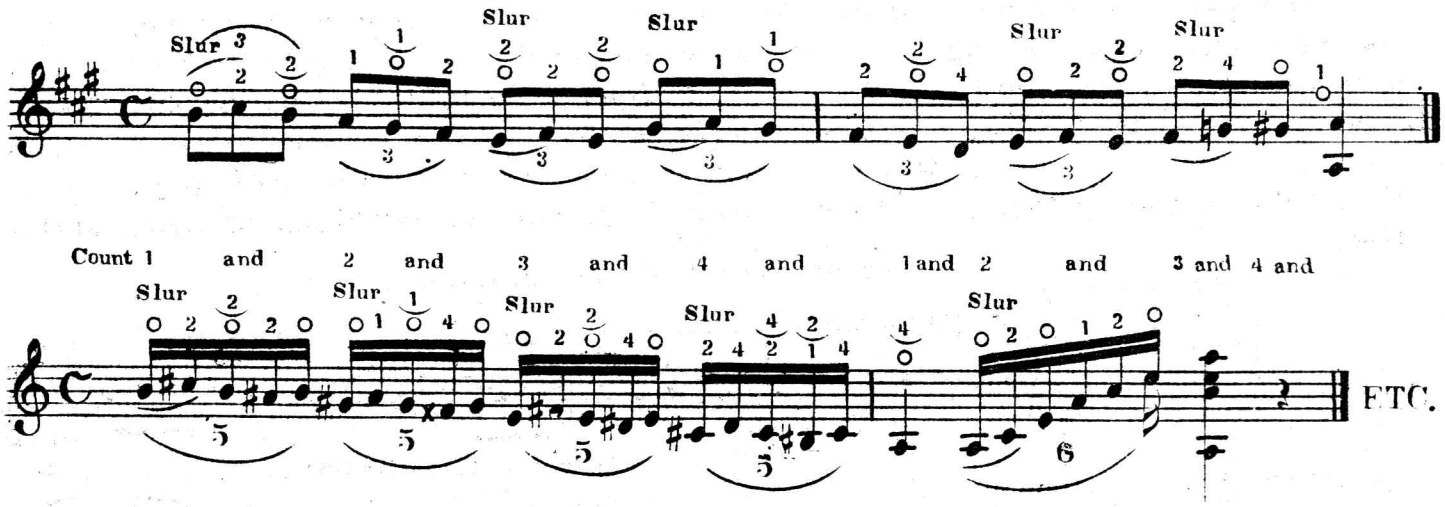
SLURRED NOTES.

Are executed in ascending,___ pick the first note with the right hand and make the second by striking down upon the string with a finger of the left hand with sufficient force to cause it to vibrate._____ Slurred notes should not be confounded with "Tied" Notes._____

The latter occupy the same degree of the staff, _____ slurred notes do not. _____

THE SLUR.

The "slur" is frequently used in connection with the snap as follows.



THE APPOGGIATURA OR GRACE NOTE.

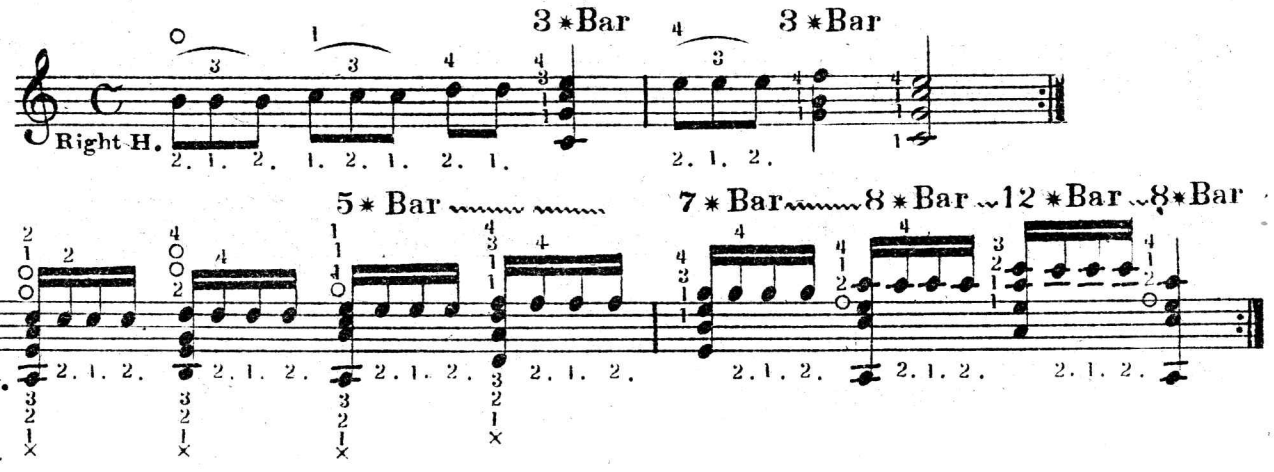
To execute the first appoggiatura in the following example, ___ stop C♯ on first string at second fret with second finger, place the fourth finger at the first string at the third fret making D, ___ sound D with the right hand and immediately pull the string with the fourth finger making C♯. The second one is made by stopping C♯ with second finger, _____ sound it with the right hand and immediately pull the string with the second finger making B.

To execute the following, ___pick the first string open B slur quickly to C♯ and pull to B open. The second half of the first measure is made in the same way, the first finger of the left hand being used on the second string. ___In the second measure strike B open slur the C♯ and D with second and fourth fingers, the remainder of the measure is played on second and third strings, ___ the notes being slurred with fingers designated.

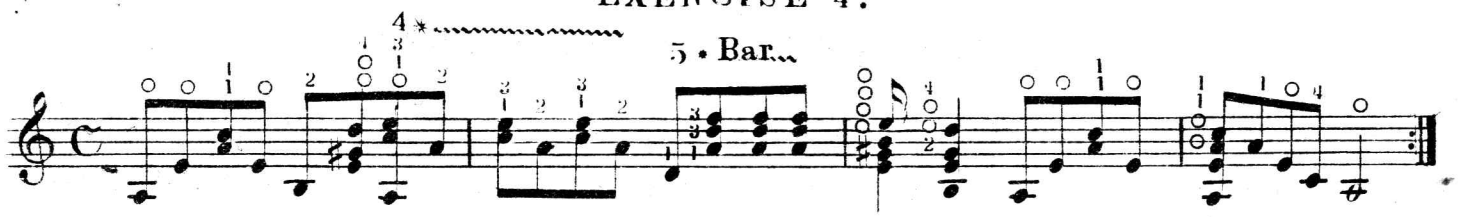
REPEATEAD NOTES ON THE SAME DEGREE OF THE STAFF.

In the Guitar style, when two or more notes occur in rapid passages on the same degree of the staff, they should be executed with the first and second fingers of the right hand.

EXAMPLES.



EXERCISE 4.



EXERCISE 5. Note carefully the Expression Marks.

EMBELLISHMENTS.

DRUM CHORDS.

The word Drum or letter D placed over or under a Chord denotes that the Chord is to be played by striking the Strings with a hammer like movement, with the side of the thumb and immediately sliding the finger nails across the Chord from the lowest note up.

EXAMPLE.

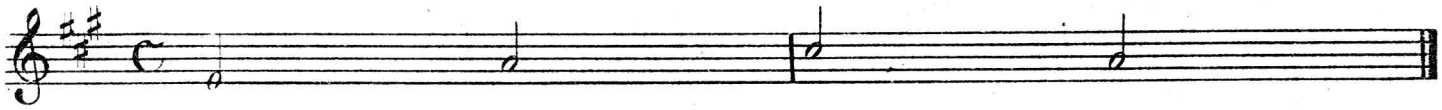
THE TREMOLO.

This movement is very effective when judiciously used, it is executed with the end of the 1st finger. Strike the strings with the end of the finger, moving it rapidly backward and forward striking the desired note with each movement of the finger, _____ the thumb should be free to pick the Melody or an accompaniment to the tremolo. ____ The Tremolo should be practised on all the strings.

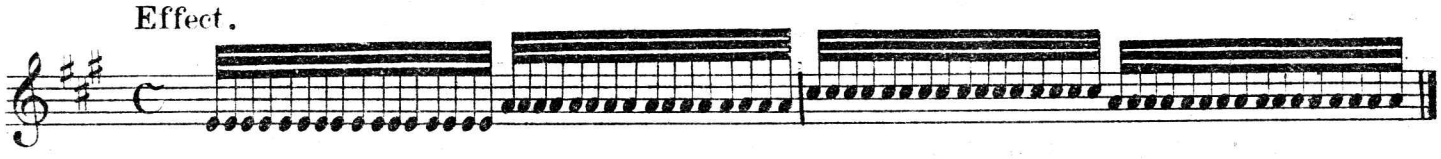
EXAMPLE.

Written.

Tremolo

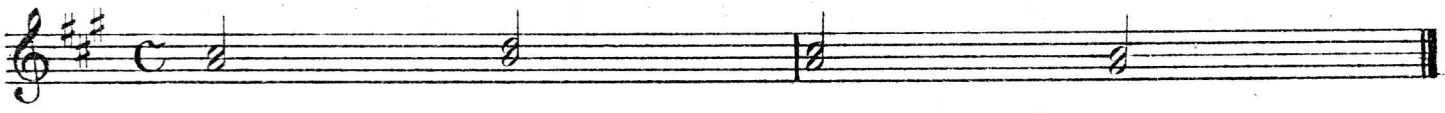


Effect.

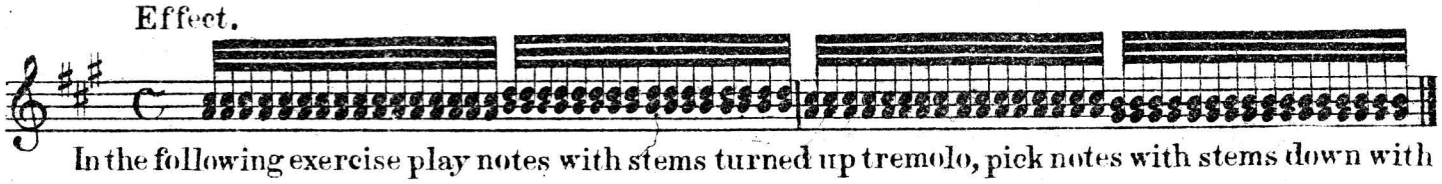


Written.

Tremolo



Effect.



In the following exercise play notes with stems turned up tremolo, pick notes with stems down with thumb.

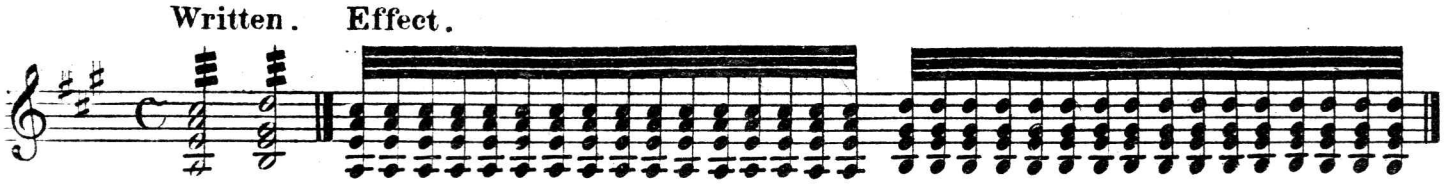
Tremolo

TREMOLO EXERCISE.

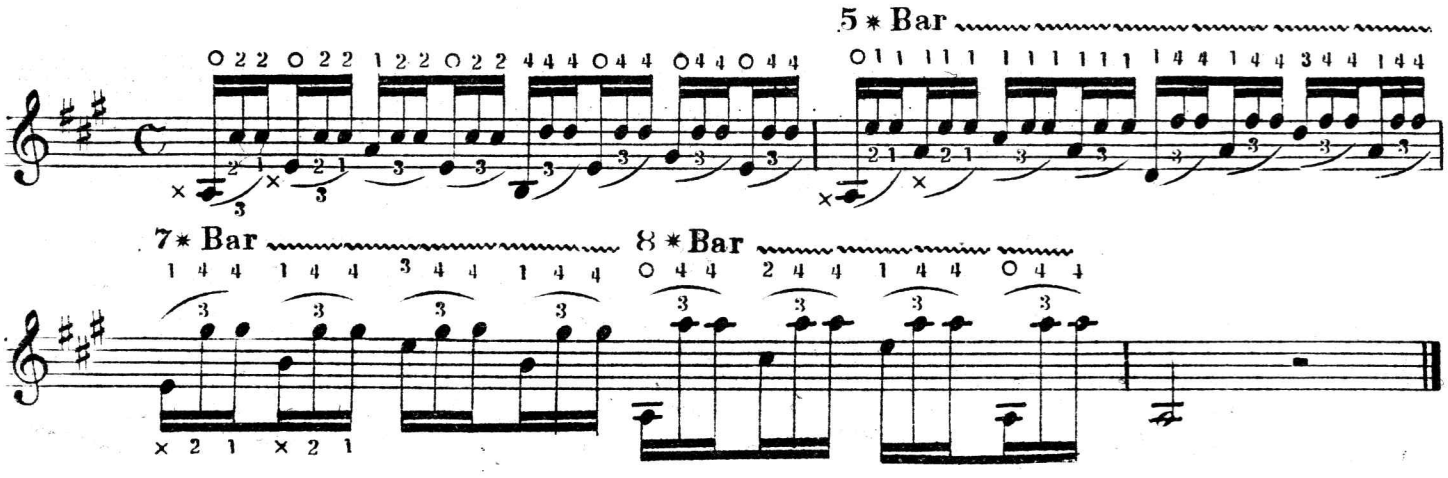
Practise until all the notes can be played smoothly and in time.

TREMOLO IN THE GUITAR STYLE.

The Roll is executed by striking the Chords with the end of the thumb, the first chords being struck from the lowest note up, the second from the highest note down, this movement must be played very rapidly to sound effective.____Thus



Passages with repeated notes can be introduced in pieces that are to be played in the Guitar Style,____when properly played this movement is fully as effective and in many pieces more brilliant than the Tremolo.____In the following exercise the right hand fingering is placed below the notes,____ X denotes thumb, 1 first finger and 2 second finger.

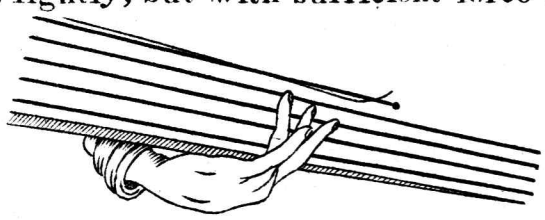


HOME SWEET HOME.

HARMONICS

Left hand harmonics are made by placing the second finger of the left hand lightly on the strings at the 5th, 7th, 12th, 19th and 22nd frets, also on the 5th string at the 17th fret.

The finger should press lightly, but with sufficient force to prevent the string from vibrating as if open.



Harmonics sound an octave higher than written.

Right hand harmonics are made by placing the ball of the second finger of the right hand on the string at the 12th fret, strike the string with the thumb under the hand and immediatly raise the second finger. All the notes within the compass of the banjo can be played harmonically. Left hand fingering is the same as in ordinary playing.

The ball of the second finger must always be 12 frets from the stopped note.

THE TURN, MORDENTE AND SHAKE OR TRILL.

The pupil should practise the following examples, taking care to use the fingering, snaps and slurs as marked.

DIRECT TURN.

BOB-TAIL GREY.

SONG AND DANCE.

Arr:for Banjo by A.BAUR.

All? vivo.

f

Voice.

Who was out to the race to-day, To see me drive my bob-tail grey?
Dear, old horse, you are my friend, On you the turf-men may de-pend;

Banjo.

'Round the track we flew like the wind, Leav-ing all the rest behind.
Thous-ands cheered as round you went, For we on vic-to-ry were bent.

On the ground with lightning speed, None could beat my no-ble steed;
To-day you have gained a name, And for life you made your fame; Long

Pub.by J.W.PEPPER.Phila.Pa
